Sample Data Section

KATAHDIN ANALYTICAL SERVICES – INORGANIC DATA QUALIFIERS

The sampled date indicated on the attached Report(s) of Analysis (ROA) is the date for which a grab sample was collected or the date for which a composite sample was completed. Beginning and start times for composite samples can be found on the Chain-of-Custody.

U Indicates the compound was analyzed for but not detected above the specified level. This level may be the Practical Quantitation Level (PQL) (also called Limit of Quantitation (LOQ)), the Limit of Detection (LOD) or Method Detection Limit (MDL) as required by the client.

Note: All results reported as "U" MDL have a 50% rate for false negatives compared to those results reported as "U" PQL "U" LOQ or "U" LOD, where the rate of false negatives is <1%.

E Estimated value. This flag identifies compounds whose concentrations exceed the upper level of the calibration range of the instrument for that specific analysis.

J Estimated value. The analyte was detected in the sample at a concentration less than the laboratory Practical Quantitation Level (PQL) (also called Limit of Quantitation (LOQ)), but above the Method Detection Limit (MDL).

I-7 The laboratory's Practical Quantitation Level (PQL) or LOQ could not be achieved for this parameter due to sample composition, matrix effects, sample volume, or quantity used for analysis.

A-4 Please refer to cover letter or narrative for further information.

H_ Please note that the regulatory holding time for _____ is "analyze immediately". Ideally, this analysis must be performed in the field at the time of sample collection. _____ for this sample was not performed at the time of sample collection. The analysis was performed as soon as possible after receipt by the laboratory.

H1 - pH H2 - DO H3 - sulfite H4 - residual chlorine

T1 The client did not provide the full volume of at least one liter for analysis of TSS. Therefore, the PQL of 2.5 mg/L could not be achieved.

T2 The client provided the required volume of at least one liter for analysis of TSS, but the laboratory could not filter the full one liter volume due to the sample matrix. Therefore, the PQL of 2.5 mg/L could not be achieved.

M1 The matrix spike and/or matrix spike duplicate recovery performed on this sample was outside of the laboratory acceptance criteria. Sample matrix is suspected. The laboratory criteria was met for the Laboratory Control Sample (LCS) analyzed concurrently with this sample.

M2 The matrix spike and/or matrix spike duplicate recovery was outside of the laboratory acceptance criteria. The native sample concentration is greater than four times the spike added concentration so the spike added could not be distinguished from the native sample concentration.

R1 The relative percent difference (RPD) between the duplicate analyses performed on this sample was outside of the laboratory acceptance criteria (when both values are greater than ten times the PQL).

MCL	Maximum Contaminant Level	NL	No limit
NFL	No Free Liquid Present	FLP	Free Liquid Present
NOD	No Odor Detected	TON	Threshold Odor Number

D-1 As required by Method 5210B, APHA Standard Methods for the Examination of Water and Wastewater (21st edition), the BOD value reported for this sample is 'qualified' because the check standard run concurrently with the sample analysis did not meet the criteria specified in the method (198 +/- 30.5 mg/L). These results may not be reportable for compliance purposes.

D-2 The measured final dissolved oxygen concentrations of all dilutions were less than the method-specified limit of 1 mg/L. The reported BOD result was calculated assuming a final oxygen concentration equal to 1 mg/L. The reported value should be considered a minimum value.

D-3 The dilution water used to prepare this sample did not meet the method and/or regulatory criteria of less than 0.2 or 0.4 mg/L dissolved oxygen (DO) uptake over the five day period of incubation. These results may not be reportable for compliance purposes.

Eurofins Lancaster Laboratories Environment Testing, LLC
2425 New Holland Pike
Lancaster PA 17601

See page two for job notes and contact information.

my EOL

Eurofins Lancaster Laboratories Environment Testing, LLC

Job Notes

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Authorization

Generated
2/16/2023 10:56 AM

Authorized for release by
Stephen J Gordon, Senior Project Manager
Stephen.Gordon@et.eurofinsus.com
412 525-0071

Eurofins Lancaster Laboratories Environment Testing, LLC

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.
· QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
· Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
· Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.
Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Definitions/Glossary

Client: Katahdin Analytical Services
Job ID: 410-114770-1
Project/Site: DOW

Qualifiers

General Chemistry

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job Narrative
410-114770-1

Receipt
The samples were received on 2/8/2023 10:04 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 6.2°C

Receipt Exceptions
The following samples were received at the laboratory outside the required temperature criteria: SY-SB4R-1 (410-114770-1), SY-SB4R-10 (410-114770-2) and SY-SB4R-2 (410-114770-3). This does not meet regulatory requirements. The client was contacted regarding this issue, and the laboratory was instructed to proceed with analysis.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Detection Summary

Reagent

WC_TOC_SLCSCC_00007

1. The **Certified Values** are the actual "made-to" concentrations confirmed by ERA analytical verification. The certified values are monitored and purchasers will be notified of any significant changes resulting in recertification or withdrawal of this certified reference material during the period of validity of this certificate.

2. The **Uncertainty** represents an expanded uncertainty and approximates a 95% confidence interval. The uncertainty is based on the characterization, homogeneity and stability characteristics of the product, multiplied by a coverage factor (k=2). The uncertainty applies to the product as supplied and does not take into account any required or optional dilution and/or preparations the laboratory may perform while using this product. The formula used to calculate the expanded uncertainty is:
$U_{expanded} = k * SQRT((U_{char}^2) + (U_{homogen}^2) + (U_{LTS}^2) + (U_{STS}^2) + (U_{RSS}^2))$

Where:

$U_{expanded}$ = Expanded uncertainty.
k = Coverage factor.
U_{char} = Combined standard uncertainty of the manufacturing and/or analytical verification assessment.
$U_{homogen}$ = Standard uncertainty of the homogeneity assessment.
U_{LTS} = Standard uncertainty associated with long-term stability.
U_{STS} = Standard uncertainty associated with short-term (transport) stability.
U_{RSS} = Standard uncertainty associated with repeated sampling of the product (where permitted by product use instructions).

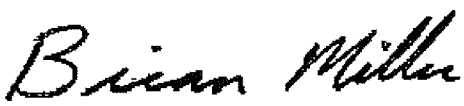
3. The **QC Performance Acceptance Limits (QC PALs™)** are based on actual historical data collected in ERA's Proficiency Testing program. The QC PALs™ reflect any inherent biases in the methods used to establish the limits and closely approximate a 95% confidence interval of the performance that experienced laboratories should achieve using accepted environmental methods. Use the QC PALs™ to realistically evaluate your performance against your peers.

4. The **PT Performance Acceptance Limits (PT PALs™)** are calculated using the regression equations and fixed acceptance criteria specified in the NELAC proficiency testing requirements. Use the PT PALs™ when analyzing this certified reference material alongside USEPA and NELAC compliant PT study materials. Please note that many PT study acceptance limits are concentration dependent (some non-linearly) and therefore, the acceptance limits of this certified reference material and any PT study material may differ relative to their difference in concentrations.

5. The **PT Performance Data** include the mean value, percent recovery and number of data points reported by laboratories in our Proficiency Testing study compared to the Certified Values. In the event this lot was not used in a proficiency testing scheme, the data displayed was generated internally by ERA.

6. Where NIST Standard Reference Materials (SRMs) are available, each analyte has been analytically traced to the NIST SRM listed. **Analytical Traceability Recovery (%)** = [(% recovery ERA certified reference material)/(% recovery NIST SRM)]*100
The traceability data shown were compiled by analyzing this ERA certified reference material and/or it's associated stock solution(s) against the applicable NIST SRMs.

7. The **Reference Values** are equal to the mean recoveries for the parameters as determined in an interlaboratory round robin study. The **Reference Values** represent the expected performance for the analytes in this standard. ERA recommends using the **Reference Values** when assessing or evaluating your results.



8. **Metrological Traceability**. This certified reference material is metrologically traceable to NIST mass reference materials through an unbroken chain of comparisons.

9. For additional information on this product such as intended use, storage information, instructions for use, minimum sample size, and safety information, please refer to the Product Use Instructions provided.

If you have any questions or need technical assistance, please call ERA technical assistance at 1-800-372-0122 or send an email to info@eraqc.com.

Certificate Issue Date: March 23, 2021
Expiration Date: October 13, 2024
Revision Number: Original

Product use instructions are included as part of the certification packet and are paginated separately from this Certificate of Analysis. Please reference the product use instructions for catalog #542 revision 090119.

CERTIFICATION

Parameter	Certified Value[1]	Reference Value[7]	Uncertainty[2]	QC Performance Acceptance Limits[3]	PT Performance Acceptance Limits[4]
	mg/kg	mg/kg	%	mg/kg	mg/kg
Ammonia as N	1210	1090	6.25	698 - 1470	665 - 1510
Total Kjeldahl Nitrogen	1720	1700	12.5	1100 - 2300	944 - 2460
Total Organic Carbon (TOC)	5000	4690	9.55	1690 - 7680	1610 - 7770
Total Phosphorus	1710	1570	20.5	828 - 2300	439 - 2690

ANALYTICAL VERIFICATION

Question	Answer	Comment
The cooler's custody seal is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable (</=6C, not frozen).	False	Cooler temperature outside required temperature criteria.
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable (</=6C, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A	

Laboratory Report

Absolute Resource associates
124 Heritage Avenue Portsmouth NH 03801

Allison Drouin
CREDERE Associates
776 Main Street
Westbrook, ME 04092

PO Number: None
Job ID: 67797
Date Received: 11/8/23

Project: Dow Salvage Yard 18001468

Attached please find results for the analysis of the samples received on the date referenced above.

Unless otherwise noted in the attached report, the analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. The Standard Operating Procedures are based upon USEPA SW-846, USEPA Methods for Chemical Analysis of Water and Wastewater, Standard Methods for the Examination of Water and Wastewater and other recognized methodologies. The results contained in this report pertain only to the samples as indicated on the chain of custody.

Absolute Resource Associates maintains certification with the agencies listed below. The reported results apply to the sample(s) in the condition as received at the time the laboratory took custody. This report shall not be reproduced except in full, without written approval of the laboratory. The liability of ARA is limited to the cost of the requested analyses, unless otherwise agreed upon in writing.

We appreciate the opportunity to provide laboratory services. If you have any questions regarding the enclosed report, please contact the laboratory and we will be glad to assist you.

Sincerely,
Absolute Resource Associates

Aaron DeWees
Chief Operating Officer

Date of Approval: 1/3/2024

Quality Control Report

124 Heritage Avenue Unit 16
Portsmouth, NH 03801
www.absoluteresourceassociates.com

Case Narrative
Lab # 67797

Sample Receiving and Chain of Custody Discrepancies

Samples were received in acceptable condition, between 0 and 6 degrees C, on ice, and in accordance with sample handling, preservation and integrity guidelines.
The analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan and the requirements set forth by the associated Sampling and Analysis Plan dated December 2022 (final), except as noted below.
Absolute Resource Associates is an ISO/IEC 17025:2017 DoD accredited "Testing Laboratory" through PJLA with an accreditation # 78237. The analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. Parameters included in the ARA current DoD certification also met the requirements set forth by the current DoD Quality Systems Manual, except as noted below. See included table for analytes or parameters not included in ARA scope of DoD accreditation, if applicable.
The sample bottle for 67797-001 (SY-OBMW7-110623) PCB analysis was broken in the laboratory. No additional sample volume remains for analysis.

Calibration

No exceptions noted.

Method Blank

No exceptions noted.

Surrogate Recoveries

No exceptions noted.

Laboratory Control Sample Results

VOC: The LCS2303694 did not meet the acceptance criteria for carbon disulfide and t-butanol (TBA). These compounds showed high recoveries. The relative percent difference between the LCS and LCSD2303694 was outside the acceptance criteria for t-butanol (TBA) and 1,1,2-trichloroethane. There is no impact to the data as these analytes were not detected in the associated samples.
SVOC: The LCS/D17096 did not meet the acceptance criteria for several compounds. These compounds showed low recoveries. The relative percent difference between the LCS and LCSD17096 was outside the acceptance criteria for several compounds. No additional sample volume remains for re-analysis. The results have been qualified accordingly.
EPH: The LCS/D17110 did not meet the acceptance criteria for naphthalene, 2-methylnaphthalene, indeno(1,2,3-cd)pyrene, dibenzo(a,h)anthracene, and C9-C18 Aliphatics. These compounds showed low recoveries. The relative percent difference between the LCS and LCSD17110 was outside the acceptance criteria for C19-C36 Aliphatics. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

Matrix Spike/Matrix Spike Duplicate/Duplicate Results

Not requested for this project.

Other

QC: Due to spiking concentrations or expected concentrations being below the LOQ in the LCS/D &/or MS/MSD the following compounds have been reported in these QC samples with lower LOQs to show calculated percent recoveries: benzoic acid, benzidine, and C9-C18 Aliphatics.
Reporting Limits: Dilutions performed during the analysis are noted on the result pages.

No other exceptions noted.

Data Qualifiers

U = This compound was analyzed for, but not detected above the associated limit of detection.
J = The analytical result was below the instrument calibration range, but above the method detection limit. The reported concentration is an estimate.
m = An "m" next to the "Response" value reported on the raw data sheets indicates a manual integration was performed.

Abbreviations for Manual Integrations

BC = Baseline Correction: The software integration of the baseline was inappropriate for the chromatogram
MI = Mis-Identification: The software integrated the incorrect peak
PS = Peak Separation: Two peaks exist in the chromatogram but the software integrated them as one
RI = Range Integration: Software does not perform range integrations, must be performed manually
NB = Noisy Baseline: Software mis-integrated due to a noisy baseline
PM = Peak Missed: Software did not integrate the target peak

Absolute Resource Associates does not hold DoD Certification for the following analytes:

Waters

Analyte	CAS	Reference
1,3,5-trichlorobenzene	108-70-3	SW5030C8260D
1,4-dioxane	123-91-1	SW5030C8260D
diethyl ether	60-29-7	SW5030C8260D
tetrahydrofuran (THF)	109-99-9	SW5030C8260D

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

TB addressed in case narr. (LCSD)
#Trace hits are in non-Potd portion A-v. BN

Notes:
Reviewer Initials & Date: 11/29/23

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date ✓
- Chromatogram Checked, Major peaks identified ✓
- Prep data checked: weight, volume, %solid, Prep date X
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Correct dilution and reason clear or noted ✓
- Reason for reanalysis documented
- Surrogates pass or flagged & noted ✓
- Flags checked (Expiration, Over Cal)
- Other QC failures, estimates or interferences documented ✓
- Spot checked Reported Result with Quant Report ✓
- Checked Audit flagged data in LIMS
- Correct values averaged
- Column RPD is OK or both results included
- Correct column reported

Hi Aaron,

No it would be the full list per the QAPP. Let me know if you need the QAPP, it has not changed and is still the version dated December 2022.

Lab: ARA
Matrix: Groundwater
Method: Metals by EPA Method 6020A (SOP QA-5605)

Compound	PAL (µg/L)	Basis of Human Health PAL	PQLG (µg/L)	LOQ (µg/L)	LOD (µg/L)	MDL (µg/L)
Aluminum	2,000[a,c]	Non-Cancer	1,000	50	10	2.2
Antimony	0.78[a,c]	Non-Cancer	1	1	0.5	0.42
Arsenic	0.052[a,c]	Cancer	5	5	1	0.35
Barium	380[a,c]	Non-Cancer	190	10	0.5	0.22
Beryllium	2.5[a,c]	Non-Cancer	1.25	1	0.1	0.01
Cadmium	0.18[a,c]	Non-Cancer	1	1	0.5	0.1
Chromium, total	NE	-	50	10	1	0.48
Cobalt	0.6[a,c]	Non-Cancer	10	10	1	0.29
Copper	80[a,c]	Non-Cancer	40	10	1	0.29
Iron	1400[a,c]	Non-Cancer	700	50	10	3.2
Lead	5[a,b,c]	Non-Cancer	7.5	5	0.5	0.1
Magnesium	NE	-	500	100	20	0.66
Manganese	43[a,c]	Non-Cancer	21.5	10	5	1
Nickel	39[a,c]	Non-Cancer	19.5	10	1	0.63
Potassium	NE	-	2500	500	100	88
Selenium	10[a,c]	Non-Cancer	10	10	1	0.45
Silver	9.4[a,c]	Non-Cancer	5	5	0.05	0.02
Sodium	NE	-	500	100	50	21

Subject: Dow Salvage Yard

Good morning Allison,
Can you confirm that the metals list for Dow Salvage Yard samples is RCRA8?
One of the CoCs just has “metals” checked and the other has “RCRA” written in by the metals.
Thanks, -Aaron.

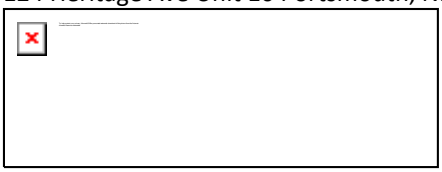
Subject: Dow Salvage Yard 18001468 ARA # 67797 and 67798



I probably should have communicated these issues awhile back, but they kind of fell through the cracks with everything going on. There are two issues that effected PCB samples for the Dow job.

SY-OBMW7-110623 sample bottle was broken in lab so we had no water remaining to extract. I've noted this on the CoC as well as the case narrative.

SY-OBMW4R-110723 during the final extract concentration step, the vial was dropped and cracked. An unknown portion of the extract was lost, so we continued on, in case not much was lost. However, the surrogate recoveries were 3% which suggests quite a bit was lost. I put these results in the report with an explanation in the case narrative. Let me know if you'd rather we take the results out. The sample was ND.

-Aaron.

Laboratory Report

Absolute Resource associates
124 Heritage Avenue Portsmouth NH 03801

Allison Drouin
CREDERE Associates
776 Main Street
Westbrook, ME 04092

PO Number: None
Job ID: 67798
Date Received: 11/8/23

Project: Dow Salvage Yard 18001468

Attached please find results for the analysis of the samples received on the date referenced above.

Unless otherwise noted in the attached report, the analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. The Standard Operating Procedures are based upon USEPA SW-846, USEPA Methods for Chemical Analysis of Water and Wastewater, Standard Methods for the Examination of Water and Wastewater and other recognized methodologies. The results contained in this report pertain only to the samples as indicated on the chain of custody.

Absolute Resource Associates maintains certification with the agencies listed below. The reported results apply to the sample(s) in the condition as received at the time the laboratory took custody. This report shall not be reproduced except in full, without written approval of the laboratory. The liability of ARA is limited to the cost of the requested analyses, unless otherwise agreed upon in writing.

We appreciate the opportunity to provide laboratory services. If you have any questions regarding the enclosed report, please contact the laboratory and we will be glad to assist you.

Sincerely,
Absolute Resource Associates

2,5-dibromotoluene as Aliphatic SUR	95	70-130			%	1	SFP			2303773	11/16/23	20:56	MA VPH

Hydrocarbon Range data exclude concentrations of any surrogate(s) and/or internal standards eluting in that range.
C5-C8 Aliphatic Hydrocarbons exclude the concentration of target analytes eluting in that range.
C9-C12 Aliphatic Hydrocarbons exclude concentration of target analytes eluting in that range AND C9-C10 Aromatics.

Quality Control Report

124 Heritage Avenue Unit 16
Portsmouth, NH 03801
www.absoluteresourceassociates.com

Case Narrative
Lab # 67798

Sample Receiving and Chain of Custody Discrepancies

Samples were received in acceptable condition, between 0 and 6 degrees C, on ice, and in accordance with sample handling, preservation and integrity guidelines.
The analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan and the requirements set forth by the associated Sampling and Analysis Plan dated December 2022 (final), except as noted below.
Absolute Resource Associates is an ISO/IEC 17025:2017 DoD accredited "Testing Laboratory" through PJLA with an accreditation # 78237. The analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. Parameters included in the ARA current DoD certification also met the requirements set forth by the current DoD Quality Systems Manual, except as noted below. See included table for analytes or parameters not included in ARA scope of DoD accreditation, if applicable.

Calibration

No exceptions noted.

Method Blank

No exceptions noted.

Surrogate Recoveries

The sample extract for 67798-003 (SY-OBMW4R-110723) PCB analysis was spilled during the final stages of sample concentration losing an unknown amount. No additional sample volume remains for re-analysis. The results have been reported, but based on the extremely low surrogate recoveries, a significant portion of the extract was lost during the spill.
EPH: Samples 67798-007 through -010 did not meet acceptance criteria for the extraction surrogate 1-chloro-octadecane. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

Laboratory Control Sample Results

VOC: The LCS2303675 did not meet the acceptance criteria for t-butanol (TBA), 1,4-dioxane, and 1,2,3-trichloropropane. The LCS2303675 did not meet the acceptance criteria for chloroethane, diethyl ether, t-butanol (TBA), toluene, 1,3-dichloropropane, and 1,2,3-trichloropropane. These compounds showed high recoveries. There is no impact to the data as these analytes were not detected in the associated samples.
SVOC: The LCS/D17096 did not meet the acceptance criteria for several compounds. These compounds showed low recoveries. The relative percent difference between the LCS and LCSD17096 was outside the acceptance criteria for several compounds. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

EPH: The LCS/D17110 did not meet the acceptance criteria for naphthalene, 2-methylnaphthalene, indeno(1,2,3-cd)pyrene, dibenzo(a,h)anthracene, and C9-C18 Aliphatics. These compounds showed low recoveries. The relative percent difference between the LCS and LCSD17110 was outside the acceptance criteria for C19-C36 Aliphatics. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

Matrix Spike/Matrix Spike Duplicate/Duplicate Results

VOC: The matrix spike/duplicate for 67798-001 and -007 did not meet the acceptance criteria for several compounds. The associated LCS/D met the method acceptance criteria. Compounds that exhibited recoveries outside the acceptance criteria have been qualified with an "M." Matrix interference suspected.

SVOC: The matrix spike/duplicate for 67798-001 and -007 did not meet the acceptance criteria for several compounds. These compounds showed low recoveries. Similar recoveries were observed in the associated LCS/D. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

VPH: The matrix spike/duplicate for 67798-001 and -007 did not meet the acceptance criteria for Unadjusted C9-C12 Aliphatics, C5-C8 Aliphatics, C9-C12 Aliphatics, and C9-C10 Aromatics. The associated LCS/D met the method acceptance criteria. Compounds that exhibited recoveries outside the acceptance criteria have been qualified with an "M." Matrix interference suspected.

EPH: The matrix spike/duplicate for 67798-001 and -007 did not meet the acceptance criteria for naphthalene, 2-methylnaphthalene, acenaphthylene, and C19-C36 Aliphatics. These compounds showed low recoveries. Similar recoveries were observed in the associated LCS/D. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

Metals: The matrix spike for 67798-007 and -012 did not meet the acceptance criteria for Potassium. The percent recovery was acceptable in the associated LCS/D. The recovery for the PDS for is provided with the results. Matrix interference suspected. Sample results have been qualified accordingly. Magnesium was not able to be evaluated as the native sample concentration is greater than 4 times the spike concentration.

Other

QC: Due to spiking concentrations or expected concentrations being below the LOQ in the LCS/D &/or MS/MSD the following compounds have been reported in these QC samples with lower LOQs to show calculated percent recoveries: benzoic acid, benzidine, and C9-C18 Aliphatics.

Reporting Limits: Dilutions performed during the analysis are noted on the result pages.

No other exceptions noted.

Data Qualifiers

U = This compound was analyzed for, but not detected above the associated limit of detection.

J = The analytical result was below the instrument calibration range, but above the method detection limit. The reported concentration is an estimate.

m = An "m" next to the "Response" value reported on the raw data sheets indicates a manual integration was performed.

Abbreviations for Manual Integrations

BC = Baseline Correction: The software integration of the baseline was inappropriate for the chromatogram
MI = Mis-Identification: The software integrated the incorrect peak
PS = Peak Separation: Two peaks exist in the chromatogram but the software integrated them as one
RI = Range Integration: Software does not perform range integrations, must be performed manually
NB = Noisy Baseline: Software mis-integrated due to a noisy baseline
PM = Peak Missed: Software did not integrate the target peak

Absolute Resource Associates does not hold DoD Certification for the following analytes:

Waters

Analyte	CAS	Reference
1,3,5-trichlorobenzene	108-70-3	SW5030C8260D
1,4-dioxane	123-91-1	SW5030C8260D
diethyl ether	60-29-7	SW5030C8260D
tetrahydrofuran (THF)	109-99-9	SW5030C8260D
azobenzene	103-33-3	SW3510C8270E

GLOSSARY

%R	Percent Recovery
BLK	Blank (Method Blank, Preparation Blank)
CCB	Continuing Calibration Blank
CCV	Continuing Calibration Verification
CRM	Certified Reference Material (associated with solid Metals samples)
CRMD	Certified Reference Material Duplicate (associated with solid Metals samples)
Dil'n	Dilution
DL	Detection Limit
DUP	Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection
LOQ	Limit of Quantitation
MB	Methanol Blank (associated with solid VOC samples)
MLCS	Methanol Laboratory Control Sample (associated with solid VOC samples)
MLCSD	Methanol Laboratory Control Sample Duplicate (associated with solid VOC samples)
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PB	Preparation Blank
QC	Quality Control
RL	Reporting Limit
RPD	Relative Percent Difference
SUR	Surrogate

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date
- Chromatogram Checked, Major peaks identified
- Results consistent w/ other attached analyses
- Reanalysis reason noted
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
- Other QC failures or issues noted in Aspen
- Correct data file and/or date/time in Aspen

Notes:

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses ✓
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓
Other QC failures or issues noted in Aspen ✓
Correct data file and/or date/time in Aspen ✓

* To Be discussed in Conference (CLESD)

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen ✓
Correct data file and/or date/time in Aspen ✓

Tox discussed in case Narr (LCS ID)

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ✓

Chromatogram Checked, Major peaks identified ✓

Results consistent w/ other attached analyses

Reanalysis reason noted

Substitute dilution data checked

Correct dilution and reason clear or noted ✓

Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓

Other QC failures or issues noted in Aspen ✓

Correct data file and/or date/time in Aspen ✓

ATD Be discussed in case NCLSD)

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓
Other QC failures or issues noted in Aspen ✓
Correct data file and/or date/time in Aspen ✓

*TO Reduced in case narr (LCSD)

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses ✓
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted.
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen #
Correct data file and/or date/time in Aspen ✓

TOIz discussed in case narrative (LCSD)

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen ✓
Correct data file and/or date/time in Aspen ✓

TPH desumed in comp naph (LCSD)

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen ✓
Correct data file and/or date/time in Aspen ✓

To be discussed in case report (LCSD)

Notes:
Reviewer Initials & Date: QX 11/28/23

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen ✓

NTD Reduction in concentration (LLSP)

Reviewer Checks:

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

Reviewer Checks:

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

Reviewer Checks:

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date ✓
- Chromatogram Checked, Major peaks identified ✓
- Prep data checked: weight, volume, %solid, Prep date X
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC ✓
- Correct dilution and reason clear or noted ✓
- Reason for reanalysis documented
- Surrogates pass or flagged & noted ✓
- Flags checked (Expiration, Over Cal)
- Other QC failures, estimates or interferences documented ✓
- Spot checked Reported Result with Quant Report ✓
- Checked Audit flagged data in LIMS
- Correct values averaged ✓ DOD
- Column RPD is OK or both results included ✓
- Correct column reported ✓ 1

Surrogates are low because sample broke in RV tube. Flag surrogate in ASPEN and say some of the sample was lost during extraction; results are an estimate.

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date
- Chromatogram Checked, Major peaks identified
- Prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS
- Correct values averaged
- Column RPD is OK or both results included
- Correct column reported

Subject: Dow Salvage Yard

Good morning Allison,
Can you confirm that the metals list for Dow Salvage Yard samples is RCRA8?
One of the CoCs just has “metals” checked and the other has “RCRA” written in by the metals.
Thanks, -Aaron.

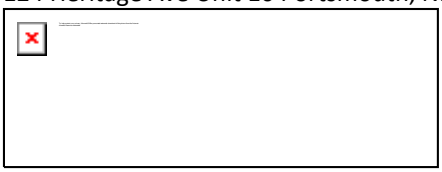
Subject: Dow Salvage Yard 18001468 ARA # 67797 and 67798



I probably should have communicated these issues awhile back, but they kind of fell through the cracks with everything going on. There are two issues that effected PCB samples for the Dow job.

SY-OBMW7-110623 sample bottle was broken in lab so we had no water remaining to extract. I've noted this on the CoC as well as the case narrative.

SY-OBMW4R-110723 during the final extract concentration step, the vial was dropped and cracked. An unknown portion of the extract was lost, so we continued on, in case not much was lost. However, the surrogate recoveries were 3% which suggests quite a bit was lost. I put these results in the report with an explanation in the case narrative. Let me know if you'd rather we take the results out. The sample was ND.

-Aaron.

Attached please find results for the analysis of the samples received on the date referenced above.

Unless otherwise noted in the attached report, the analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. The Standard Operating Procedures are based upon USEPA SW-846, USEPA Methods for Chemical Analysis of Water and Wastewater, Standard Methods for the Examination of Water and Wastewater and other recognized methodologies. The results contained in this report pertain only to the samples as indicated on the chain of custody.

Absolute Resource Associates maintains certification with the agencies listed below. The reported results apply to the sample(s) in the condition as received at the time the laboratory took custody. This report shall not be reproduced except in full, without written approval of the laboratory. The liability of ARA is limited to the cost of the requested analyses, unless otherwise agreed upon in writing.

We appreciate the opportunity to provide laboratory services. If you have any questions regarding the enclosed report, please contact the laboratory and we will be glad to assist you.

Sincerely,
Absolute Resource Associates

Aaron DeWees
Chief Operating Officer

C9-C10 Aromatics	50 U	100	50	33	ug/L	1	SFP			2303859	11/20/23	15:51	MA VPH
Surrogate Recovery		Limits											
2,5-dibromotoluene as Aromatic SUR	97	70-130			%	1	SFP			2303859	11/20/23	15:51	MA VPH
2,5-dibromotoluene as Aliphatic SUR	99	70-130			%	1	SFP			2303859	11/20/23	15:51	MA VPH

Hydrocarbon Range data exclude concentrations of any surrogate(s) and/or internal standards eluting in that range.
C5-C8 Aliphatic Hydrocarbons exclude the concentration of target analytes eluting in that range.
C9-C12 Aliphatic Hydrocarbons exclude concentration of target analytes eluting in that range AND C9-C10 Aromatics.

Quality Control Report

124 Heritage Avenue Unit 16
Portsmouth, NH 03801
www.absoluteresourceassociates.com

Case Narrative
Lab # 67836

Sample Receiving and Chain of Custody Discrepancies

Samples were received in acceptable condition, between 0 and 6 degrees C, on ice, and in accordance with sample handling, preservation and integrity guidelines.
The analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan and the requirements set forth by the associated Sampling and Analysis Plan dated December 2022 (final), except as noted below.
Absolute Resource Associates is an ISO/IEC 17025:2017 DoD accredited "Testing Laboratory" through PJLA with an accreditation # 78237. The analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. Parameters included in the ARA current DoD certification also met the requirements set forth by the current DoD Quality Systems Manual, except as noted below. See included table for analytes or parameters not included in ARA scope of DoD accreditation, if applicable.
VPH: The VOC vials for VPH analysis for sample 67836-004 (SY-BRMW5-29-44-110823) were received with an air bubble. The results have been qualified accordingly.

Calibration

No exceptions noted.

Method Blank

No exceptions noted.

Surrogate Recoveries

SVOC: The sample 67836-002 did not meet acceptance criteria for the extraction surrogate 2-fluorophenol. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

EPH: The sample 67836-011 and LCSD17156 did not meet acceptance criteria for the extraction surrogate 1-chloro-octadecane. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

Laboratory Control Sample Results

VOC: The LCSD2303756 did not meet the acceptance criteria for m&p-xylenes. This compound showed high recovery. There is no impact to the data as this analyte was not detected in the associated samples.
VPH: The relative percent difference between the LCS and LCSD2303859 was outside the acceptance criteria for Unadjusted C9-C12 Aliphatics. There is no impact to the data as this range was not detected in the associated samples.
SVOC: The LCS/D17124 did not meet the acceptance criteria for several compounds. These compounds showed low recoveries. The relative percent difference between the LCS and LCSD17124 was outside the acceptance criteria for one compound. No additional sample volume remains for re-analysis. The results have been qualified accordingly.

EPH: The LCS17156 did not meet the acceptance criteria for C9-C18 Aliphatics. This range showed low recovery. No additional sample volume remains for re-analysis. The results have been qualified accordingly. The relative percent difference between the LCS and LCSD17156 was outside the acceptance criteria for naphthalene and 2-methylnaphthalene. There is no impact to the data as these compounds were not detected in the associated samples.

Matrix Spike/Matrix Spike Duplicate/Duplicate Results

Not requested for this project.

Other

QC: Due to spiking concentrations or expected concentrations being below the LOQ in the LCS/D &/or MS/MSD the following compounds have been reported in these QC samples with lower LOQs to show calculated percent recoveries: benzoic acid, benzidine, and C9-C18 Aliphatics.
Reporting Limits: Dilutions performed during the analysis are noted on the result pages.

No other exceptions noted.

Data Qualifiers

U = This compound was analyzed for, but not detected above the associated limit of detection.
J = The analytical result was below the instrument calibration range, but above the method detection limit. The reported concentration is an estimate.
m = An "m" next to the "Response" value reported on the raw data sheets indicates a manual integration was performed.

Abbreviations for Manual Integrations

BC = Baseline Correction: The software integration of the baseline was inappropriate for the chromatogram
MI = Mis-Identification: The software integrated the incorrect peak
PS = Peak Separation: Two peaks exist in the chromatogram but the software integrated them as one
RI = Range Integration: Software does not perform range integrations, must be performed manually
NB = Noisy Baseline: Software mis-integrated due to a noisy baseline
PM = Peak Missed: Software did not integrate the target peak

Absolute Resource Associates does not hold DoD Certification for the following analytes:

Waters

Analyte	CAS	Reference
1,3,5-trichlorobenzene	108-70-3	SW5030C8260D
1,4-dioxane	123-91-1	SW5030C8260D
diethyl ether	60-29-7	SW5030C8260D
tetrahydrofuran (THF)	109-99-9	SW5030C8260D
azobenzene	103-33-3	SW3510C8270E

GLOSSARY

%R	Percent Recovery
BLK	Blank (Method Blank, Preparation Blank)
CCB	Continuing Calibration Blank
CCV	Continuing Calibration Verification
CRM	Certified Reference Material (associated with solid Metals samples)
CRMD	Certified Reference Material Duplicate (associated with solid Metals samples)
Dil'n	Dilution
DL	Detection Limit
DUP	Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection
LOQ	Limit of Quantitation
MB	Methanol Blank (associated with solid VOC samples)
MLCS	Methanol Laboratory Control Sample (associated with solid VOC samples)

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date ·
Chromatogram Checked, Major peaks identified ·
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ·
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
QC discussed in case narr. Other QC failures or issues noted in Aspen C. NARR
Correct data file and/or date/time in Aspen ✓

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified, Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted.
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓
Other QC failures or issues noted in Aspen C.NARR
Correct data file and/or date/time in Aspen ✓

Notes:
Reviewer Initials & Date: CS 12/6/23

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓
Other QC failures or issues noted in Aspen ✓ NARR
Correct data file and/or date/time in Aspen ✓

Notes:
Reviewer Initials & Date: JC 12/6/23

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date ✓
Chromatogram Checked, Major peaks identified ✓
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted ✓
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC) ✓
Other QC failures or issues noted in Aspen C,NH2
Correct data file and/or date/time in Aspen ✓

Notes:
Reviewer Initials & Date: 12/6/23

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

Notes:
Reviewer Initials & Date: 12/7/23

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

Notes:
Reviewer Initials & Date: SJ 12/7/23

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

Notes:
Reviewer Initials & Date:

Reviewer Checks:
Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

Notes:
Reviewer Initials & Date: 12/7/23

Reviewer Checks:

Quant Report: Reviewed, Analyst Initials & Date
Chromatogram Checked, Major peaks identified
Results consistent w/ other attached analyses
Reanalysis reason noted
Substitute dilution data checked
Correct dilution and reason clear or noted
Flags checked (Expiration, F+, Over Cal, Surr, Aspen, QC)
Other QC failures or issues noted in Aspen
Correct data file and/or date/time in Aspen

Notes:

Reviewer Checks:

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

Reviewer Checks:

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

Reviewer Checks:

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

- Quant Report: Reviewed? Ranges integrated? Analyst Initials & Date?
- Chromatogram Checked? Major peaks identified?
- Soil prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Substitute dilution data checked
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, F+, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date
- Chromatogram Checked, Major peaks identified
- Prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS
- Correct values averaged
- Column RPD is OK or both results included
- Correct column reported

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date
- Chromatogram Checked, Major peaks identified
- Prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS
- Correct values averaged
- Column RPD is OK or both results included
- Correct column reported

Reviewer Checks:

- Quant Report: Reviewed, Analyst Initials & Date
- Chromatogram Checked, Major peaks identified
- Prep data checked: weight, volume, %solid, Prep date
- Field ID consistent with data and any field replicates
- Results consistent with any re-runs & internal QC
- Correct dilution and reason clear or noted
- Reason for reanalysis documented
- Surrogates pass or flagged & noted
- Flags checked (Expiration, Over Cal)
- Other QC failures, estimates or interferences documented
- Spot checked Reported Result with Quant Report
- Checked Audit flagged data in LIMS
- Correct values averaged
- Column RPD is OK or both results included
- Correct column reported

Hi Aaron,

No it would be the full list per the QAPP. Let me know if you need the QAPP, it has not changed and is still the version dated December 2022.

Lab: ARA
Matrix: Groundwater
Method: Metals by EPA Method 6020A (SOP QA-5605)

Compound	PAL (µg/L)	Basis of Human Health PAL	PQLG (µg/L)	LOQ (µg/L)	LOD (µg/L)	MDL (µg/L)
Aluminum	2,000[a,c]	Non-Cancer	1,000	50	10	2.2

Subject: Dow Salvage Yard

Good morning Allison,
Can you confirm that the metals list for Dow Salvage Yard samples is RCRA8?
One of the CoCs just has “metals” checked and the other has “RCRA” written in by the metals.
Thanks, -Aaron.

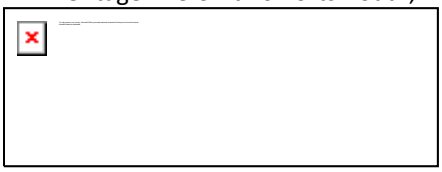
Subject: 67836 & 67839 Samples

Hi Allison,



A few things we noticed with "Dow Salvage Yard" we had questions on.

Sample "SY-BRMW5-29-44-110823" from Group 1 samples had headspace in both vials. Would you like us to proceed with analysis?

Sample "SY-BRMW4-138-148-110923" from Group 2 samples had no volume in the second vial, so we only have the first vial to run for VPH analysis.

Thanks,
Olivia

PO Number: None
Job ID: 67839
Date Received: 11/10/23

Project: Dow Salvage Yard 18001468

Attached please find results for the analysis of the samples received on the date referenced above.

Unless otherwise noted in the attached report, the analyses performed met the requirements of Absolute Resource Associates' Quality Assurance Plan. The Standard Operating Procedures are based upon USEPA SW-846, USEPA Methods for Chemical Analysis of Water and Wastewater, Standard Methods for the Examination of Water and Wastewater and other recognized methodologies. The results contained in this report pertain only to the samples as indicated on the chain of custody.

Absolute Resource Associates maintains certification with the agencies listed below. The reported results apply to the sample(s) in the condition as received at the time the laboratory took custody. This report shall not be reproduced except in full, without written approval of the laboratory. The liability of ARA is limited to the cost of the requested analyses, unless otherwise agreed upon in writing.

We appreciate the opportunity to provide laboratory services. If you have any questions regarding the enclosed report, please contact the laboratory and we will be glad to assist you.

Sincerely,
Absolute Resource Associates
