Accreditation/Certification Summary

Client: Waste Management
Job ID: 480-162327-1
Project/Site: Crossroads ME-2019 GW Tri-ann event

Laboratory: Eurofins TestAmerica, Buffalo

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	NY00044	12-04-20

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
9038		Ground Water	Sulfate
9038		Water	Sulfate
9251		Ground Water	Chloride
9251		Water	Chloride
Field Sampling		Ground Water	Depth to Water from Top of Casing
Field Sampling		Ground Water	Field EH/ORP
Field Sampling		Ground Water	Field pH
Field Sampling		Ground Water	Ground Water Elevation
Field Sampling		Ground Water	Oxygen, Dissolved
Field Sampling		Ground Water	Purge Rate
Field Sampling		Ground Water	Specific Conductance
Field Sampling		Ground Water	Temperature
Field Sampling		Ground Water	Turbidity
Field Sampling		Water	Depth to Water from Top of Casing
Field Sampling		Water	Field EH/ORP
Field Sampling		Water	Field pH
Field Sampling		Water	Ground Water Elevation
Field Sampling		Water	Oxygen, Dissolved
Field Sampling		Water	Specific Conductance
Field Sampling		Water	Temperature
Field Sampling		Water	Turbidity
SM 1030E		Ground Water	Anion/Cation Balance
SM 1030E		Ground Water	Calculated TDS
SM 1030E		Ground Water	TDS Ratio
SM 1030E		Ground Water	TDS to Conductivity Ratio

Laboratory: Eurofins TestAmerica, Savannah

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	GA00006	09-25-20

Quantitation Limit Exceptions Summary

Client: Waste Management
Job ID: 480-162327-1
Project/Site: Crossroads ME-2019 GW Tri-ann event

The requested project specific reporting limits listed below were less than laboratory standard quantitation limits (PQL) but greater than or equal to the laboratory method detection limits (MDL). It must be noted that results reported below lab standard quantitation limits may result in false positive/false negative values and less accurate quantitation. Routine laboratory procedures do not indicate corrective action for detections below the laboratory's PQL.

Method	Analyte	Matrix	Prep Type	Unit	Client RL	Lab PQL
6010C	Arsenic	Ground Water	Total/NA	mg/L	0.0090	0.015
6010C	Arsenic	Water	Total/NA	mg/L	0.0090	0.015

RE: Katahdin Lab Number: TM2287
Project ID: Waste Management - Crossroads
Project Manager: Mr. Galen Nickerson
Sample Receipt Date(s): November 19, 2019

Dear Ms. Fox:

Please find enclosed the following information:

* Report of Analysis (Analytical and/or Field)
* Quality Control Data Summary
* Chain of Custody (COC)
* Login Report

A copy of the Chain of Custody is included in the paginated report. If requested, the original COC is attached as an addendum to this report.

Should you have any questions or comments concerning this Report of Analysis, please do not hesitate to contact the project manager listed above. The results contained in this report relate only to the submitted samples. This cover letter is an integral part of the ROA.

We certify that the test results provided in this report meet all the requirements of the NELAC standards unless otherwise noted in an attached technical narrative or in the Report of Analysis.

We appreciate your continued use of our laboratory and look forward to working with you in the future. The following signature indicates technical review and acceptance of the data.

Please go to http://www.katahdinlab.com/cert for copies of Katahdin Analytical Services Inc. current certificates and analyte lists.

Sincerely,
KATAHDIN ANALYTICAL SERVICES

Leslie Dimond

SDG #:	Cooler: 1 of 1	Date/Time Rec.: 1825 11/19/19

Receipt Criteria	Y	N	EX*	NA	Comments and/or Resolution
1. Custody seals present / intact?				X	
2. Chain of Custody present in cooler?	X				
3. Chain of Custody signed by client?	X				
4. Chain of Custody matches samples?	X				
5. Temperature Blanks present? If not, take temperature of any sample w/ IR gun.				X	Temp (°C): 4.4°C — Thermometer ID: IR-1
Samples received at <6 °C w/o freezing?	X				Note: Not required for metals (except Hg soil) analysis.
Ice packs or ice present?	X				The lack of ice or ice packs (i.e. no attempt to begin cooling process) or insufficient ice may not meet certain regulatory requirements and may invalidate certain data.
If yes, was there sufficient ice to meet temperature requirements?	X				
If temp. out, has the cooling process begun (i.e. ice or packs present) and sample collection times <6hrs., but samples are not yet cool?	X				Note: No cooling process required for metals (except Hg soil) analysis.
6. Volatiles: **Aqueous:** No bubble larger than a pea?				✓	
Soil/Sediment: Received in airtight container?				✓	
Received in methanol?				✓	
Methanol covering soil?				✓	
D.I. Water - Received within 48 hour HT?				✓	
Air: Refer to KAS COC for canister/flow controller requirements.	√ if air included				
7. Trip Blank present in cooler?				✓	
8. Proper sample containers and volume?	✓				
9. Samples within hold time upon receipt?	✓				
10. Aqueous samples properly preserved? Metals, COD, NH3, TKN, O/G, phenol, TPO4, N+N, TOC, DRO, TPH – pH <2				✓	
Sulfide - >9				✓	
Cyanide – pH >12				✓	
11. Bottleware Prepped on:					

* Log-In Notes to Exceptions: document any problems with samples or discrepancies or pH adjustments.

FIELD INFORMATION FORM

WASTE MANAGEMENT

Site Name: Crossroads

Site No.:

Sample Point: 620A (Sample ID)

This Waste Management Field Information Form is Required
This form is to be completed, in addition to any State Forms. The Field Form is submitted along with the Chain of Custody Forms that accompany the sample containers (i.e. with the cooler that is returned to the laboratory).

Laboratory Use Only/Lab ID:

PURGE INFO

PURGE DATE (MM DD YY)	PURGE TIME (2400 Hr Clock)	ELAPSED HRS (hrs:min)	WATER VOL IN CASING (Gallons)	ACTUAL VOL PURGED (Gallons)	WELL VOLs PURGED
11/07/19	1325	02	01 L	01 L	

Note: For Passive Sampling, replace "Water Vol in Casing" and "Well Vols Purged" w/ Water Vol in Tubing/Flow Cell and Tubing/Flow Cell Vols Purged. Mark changes, record field data, below.

PURGE/SAMPLE EQUIPMENT

Purging and Sampling Equipment . . . Dedicated: (Y) or N

Purging Device: B — A-Submersible Pump, B-Peristaltic Pump, C-QED Bladder Pump, D-Bailer, E-Piston Pump, F-Dipper/Bottle

Sampling Device: B

X-Other:

Filter Device: Y or (N) — 0.45 µ or ____ µ (circle or fill in)

Filter Type: / — A-In-line Disposable, B-Pressure, C-Vacuum, X-Other

Sample Tube Type: / — A-Teflon, B-Stainless Steel, C-PVC, D-Polypropylene, X-Other:

WELL DATA

Well Elevation (at TOC): 26659 (ft/msl)

Depth to Water (DTW) (from TOC): 845 (ft)

Groundwater Elevation (site datum, from TOC): 258 14 (ft/msl)

Total Well Depth (from TOC): 1450 (ft)

Stick Up (from ground elevation): 646 (ft)

Casing ID: 2 (in)

Casing Material: PVC

Note: Total Well Depth, Stick Up, Casing Id. etc. are optional and can be from historical data, unless required by Site/Permit. Well Elevation, DTW, and Groundwater Elevation must be current.

STABILIZATION DATA (Optional)

Sample Time (2400 Hr Clock)	Rate/Unit	pH (std)	Conductance (SC/EC) (µmhos/cm@25°C)	Temp. (°C)	Turbidity (ntu)	D.O. (mg/L - ppm)	eH/ORP (mV)	DTW (ft)
		1st	1st					
		2nd	2nd					
		3rd	3rd					
		4th	4th					
Suggested range for 3 consec. readings or state Permit/State requirements*		+/- 0.2	+/- 3%	–	–	+/- 10%	+/- 25 mV	Stabilize

Stabilization Data Fields are Optional *(i.e. complete stabilization readings for parameters required by WM, Site, or State). These fields can be used where four (4) field measurements are required by State/Permit/Site. If a Data Logger or other Electronic format is used, fill in final readings below and submit electronic data separately to Site. If more fields above are needed, use separate sheet or form.*

FIELD DATA

SAMPLE DATE (MM DD YY)	pH (std)	CONDUCTANCE (umhos/cm @ 25°C)	TEMP. (°C)	TURBIDITY (ntu)	DO (mg/L-ppm)	eH/ORP (mV)	Other: Units
11/07/19	823	93	73	148	59	-845	

Final Field Readings are required *(i.e. record field measurements, final stabilized readings, passive sample readings before sampling for all field parameters required by State/Permit/Site.*

Sample Appearance: Clear — Odor: none — Color: Clear — Other:

Weather Conditions (required daily, or as conditions change): Direction/Speed: 7 SW — Outlook: Cloudy — Precipitation: Y or (N)

Specific Comments (including purge/well volume calculations if required):

FIELD COMMENTS

I certify that sampling procedures were in accordance with applicable EPA, State, and WM protocols (if more than one sampler, all should sign):

Date	Name	Signature	Company
11/07/19	Agustin Lavreiro	[signature]	KAS

Groundwater Elevation (site datum, from TOC): 2480.3 (ft/msl)

Total Well Depth (from TOC): 360 (ft)

Stick Up (from ground elevation): 3.75 (ft)

Casing ID: 2 (in)

Casing Material: PVC

Note: Total Well Depth, Stick Up, Casing Id. etc. are optional and can be from historical data, unless required by Site/Permit. Well Elevation, DTW, and Groundwater Elevation must be current.

STABILIZATION DATA (Optional)

Sample Time (2400 Hr Clock)	Rate/Unit	pH (std)	Conductance (SC/EC) (µmhos/cm@25°C)	Temp. (°C)	Turbidity (ntu)	D.O. (mg/L - ppm)	eH/ORP (mV)	DTW (ft)
		1st	1st					
		2nd	2nd					
		3rd	3rd					
		4th	4th					
Suggested (Appr. for) consec. readings or some Permit/State requirements:		+/- 0.2	+/- 3%			+/- 10%	+/- 25 mV	Stabilize

Stabilization Data Fields are Optional *(i.e. complete stabilization readings for parameters required by WM, Site, or State). These fields can be used where four (4) field measurements are required by State/Permit/Site. If a Data Logger or other Electronic format is used, fill in final readings below and submit electronic data separately to Site. If more fields above are needed, use separate sheet or form.*

FIELD DATA

SAMPLE DATE (MM DD YY)	pH (std)	CONDUCTANCE (umhos/cm @ 25°C)	TEMP. (°C)	TURBIDITY (ntu)	DO (mg/L-ppm)	eH/ORP (mV)	Other: Units
11 07 19	863	159	102	00	07	-170.5	

Final Field Readings are required *(i.e. record field measurements, final stabilized readings, passive sample readings before sampling for all field parameters required by State/Permit/Site.*

Sample Appearance: Clear — Odor: none — Color: clear — Other:

Weather Conditions (required daily, or as conditions change): Direction/Speed: 7 SW — Outlook: cloudy — Precipitation: Y or (N)

Specific Comments (including purge/well volume calculations if required):

FIELD COMMENTS

I certify that sampling procedures were in accordance with applicable EPA, State, and WM protocols (if more than one sampler, all should sign):

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time (Excluding tests with immediate HTs)..	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	N/A	
Chlorine Residual checked.	N/A

ANALYTICAL REPORT

Eurofins TestAmerica, Buffalo
10 Hazelwood Drive
Amherst, NY 14228-2298
Tel: (716)691-2600

Laboratory Job ID: 480-162881-1
Client Project/Site: Crossroads ME: S/A Surface Water
Sampling Event: Semi-Annual Surface Water (8,11)

For:
Waste Management
WMDSM, Inc- Crossroads Landfill
357 Mercer Road
PO BOX 629
Norridgewock, Maine 04957

Attn: Sherwood McKenney

Authorized for release by:
12/18/2019 9:49:31 AM
Katelyn Ferguson, Project Management Assistant I

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

Metals

Qualifier	Qualifier Description
BL	Compound is found in the associated method blank as well as inorganic sample.
U	Not Detected above the associated Quantitaion Limit

General Chemistry

Qualifier	Qualifier Description
*	QC Results not within control limits
U	Not Detected above the associated Quantitaion Limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Comments
No additional comments.

Receipt
The samples were received on 11/19/2019 10:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 3.1º C, 3.4º C and 3.7º C.

Metals
Method 6010C: The method blank for preparation batch 480-505774 and analytical batch 480-506557 contained Total Iron above the reporting limit (RL). Associated sample(s) SW-101 (480-162881-2), SW-9 (480-162881-8), SW-A (480-162881-9) and SW-C (480-162881-11) were not re-extracted and/or re-analyzed because results were greater than 10X the value found in the method blank.

Method 6010C: The Total Arsenic, Calcium, Iron, Magnesium, Manganese, and Potassium results reported for the following sample do not concur with results previously reported for this site: SW-9 (480-162881-8). Reanalysis was performed, and the results confirmed.

Method 6020A: The Total Lead results reported for the following sample do not concur with results previously reported for this site: SW-9 (480-162881-8). Reanalysis was performed, and the result(s) confirmed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
Method 350.1: The results reported for the following samples do not concur with results previously reported for this site: SW-201 (480-162881-4) and SW-204 (480-162881-6). Reanalysis was performed, and the result(s) confirmed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: Waste Management
Job ID: 480-162881-1
Project/Site: Crossroads ME: S/A Surface Water

Laboratory: Eurofins TestAmerica, Buffalo

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	NY00044	12-04-20

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
9038		Surface Water	Sulfate
9251		Surface Water	Chloride
Field Sampling		Surface Water	Field EH/ORP
Field Sampling		Surface Water	Field pH
Field Sampling		Surface Water	Oxygen, Dissolved
Field Sampling		Surface Water	Specific Conductance
Field Sampling		Surface Water	Temperature
Field Sampling		Surface Water	Turbidity
SM 1030E		Surface Water	Anion/Cation Balance
SM 1030E		Surface Water	Calculated TDS
SM 1030E		Surface Water	TDS Ratio
SM 1030E		Surface Water	TDS to Conductivity Ratio

Quantitation Limit Exceptions Summary

Client: Waste Management
Job ID: 480-162881-1
Project/Site: Crossroads ME: S/A Surface Water

The requested project specific reporting limits listed below were less than laboratory standard quantitation limits (PQL) but greater than or equal to the laboratory method detection limits (MDL). It must be noted that results reported below lab standard quantitation limits may result in false positive/false negative values and less accurate quantitation. Routine laboratory procedures do not indicate corrective action for detections below the laboratory's PQL.

Method	Analyte	Matrix	Prep Type	Unit	Client RL	Lab PQL
6010C	Arsenic	Surface Water	Total/NA	ug/L	9.0	15
6010C	Calcium	Surface Water	Total/NA	ug/L	150	500
6010C	Iron	Surface Water	Total/NA	ug/L	30	50
6010C	Potassium	Surface Water	Total/NA	ug/L	200	500
6010C	Sodium	Surface Water	Total/NA	ug/L	400	1000
6020A	Lead	Surface Water	Total/NA	ug/L	0.40	1.0
9251	Chloride	Surface Water	Total/NA	mg/L	0.50	1.0
SM 2540C	Total Dissolved Solids	Surface Water	Total/NA	mg/L	5.0	10

List Number: 1
Creator: Wallace, Cameron

List Source: Eurofins TestAmerica, Buffalo

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time (Excluding tests with immediate HTs)..	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	True	
Chlorine Residual checked.	N/A

General Chemistry

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Case Narrative

Client: Waste Management
Project/Site: Crossroads ME-Wick Drain

Job ID: 480-163035-1

Job ID: 480-163035-1

Laboratory: Eurofins TestAmerica, Buffalo

Narrative

Job Narrative
480-163035-1

Comments
No additional comments.

Receipt
The samples were received on 11/21/2019 9:45 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.1° C.

GC/MS VOA
Method 8260C: The following volatiles sample was diluted due to foaming at the time of purging during the original sample analysis: 8BCWD (480-163035-1). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: Waste Management
Project/Site: Crossroads ME-Wick Drain

Job ID: 480-163035-1

Laboratory: Eurofins TestAmerica, Buffalo

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	NY00044	12-04-20

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
9038		Ground Water	Sulfate
9251		Ground Water	Chloride
Field Sampling		Ground Water	Field EH/ORP
Field Sampling		Ground Water	Field pH
Field Sampling		Ground Water	Oxygen, Dissolved
Field Sampling		Ground Water	Specific Conductance
Field Sampling		Ground Water	Temperature
Field Sampling		Ground Water	Turbidity
SM 1030E		Ground Water	Anion/Cation Balance
SM 1030E		Ground Water	Calculated TDS
SM 1030E		Ground Water	TDS Ratio
SM 1030E		Ground Water	TDS to Conductivity Ratio

Quantitation Limit Exceptions Summary

Client: Waste Management
Job ID: 480-163035-1
Project/Site: Crossroads ME-Wick Drain

The requested project specific reporting limits listed below were less than laboratory standard quantitation limits (PQL) but greater than or equal to the laboratory method detection limits (MDL). It must be noted that results reported below lab standard quantitation limits may result in false positive/false negative values and less accurate quantitation. Routine laboratory procedures do not indicate corrective action for detections below the laboratory's PQL.

Method	Analyte	Matrix	Prep Type	Unit	Client RL	Lab PQL

WELL DATA

Well Elevation (at TOC): ____ (ft/msl)

Depth to Water (DTW) (from TOC): ____ (ft)

Groundwater Elevation (site datum, from TOC): ____ (ft/msl)

Total Well Depth (from TOC): ____ (ft)

Stick Up (from ground elevation): ____ (ft)

Casing ID: ____ (in)

Casing Material: ____

Note: Total Well Depth, Stick Up, Casing Id, etc. are optional and can be from historical data, unless required by Site/Permit. Well Elevation, DTW, and Groundwater Elevation must be current.

STABILIZATION DATA (Optional)

Sample Time (2400 Hr Clock)	Rate/Unit	pH (std)	Conductance (SC/EC) (µmhos/cm @ 25 °C)	Temp. (°C)	Turbidity (ntu)	D.O. (mg/L - ppm)	eH/ORP (mV)	DTW (ft)
	1st	1st	1st					
	2nd	2nd	2nd					
	3rd	3rd	3rd					
	4th	4th	4th					
Suggested range for 3 consec. readings or per Permit/State requirements:		+/- 0.2	+/- 3%	--	--	+/- 10%	+/- 25 mV	Stabilize

Stabilization Data Fields are Optional *(i.e. complete stabilization readings for parameters required by WM, Site, or State). These fields can be used where four (4) field measurements are required by State/Permit/Site. If a Data Logger or other Electronic format is used, fill in final readings below and submit electronic data separately to Site. If more fields above are needed, use separate sheet or form.*

FIELD DATA

SAMPLE DATE (MM DD YY)	pH (std)	CONDUCTANCE (umhos/cm @ 25°C)	TEMP. (°C)	TURBIDITY (ntu)	DO (mg/L-ppm)	eH/ORP (mV)	Other: Units
11/21/19	6.21	998	17.1	4.8	3.2	-6.05	

Final Field Readings are required *(i.e. record field measurements, final stabilized readings, passive sample readings before sampling for all field parameters required by State/Permit/Site.*

FIELD COMMENTS

Sample Appearance: Normal Odor: None Color: clear Other: ____

Weather Conditions (required daily, or as conditions change): Direction/Speed: calm Outlook: cloudy Precipitation: Y or (N)

Specific Comments (including purge/well volume calculations if required): ____

I certify that sampling procedures were in accordance with applicable EPA, State, and WM protocols (if more than one sampler, all should sign):

Date	Name	Signature	Company

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time (Excluding tests with immediate HTs)..	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	KAS
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	N/A	
Chlorine Residual checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

Metals

Qualifier	Qualifier Description
BL	Compound is found in the associated method blank as well as inorganic sample.
U	Not Detected above the associated Quantitaion Limit

General Chemistry

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 480-163278-1

Laboratory: Eurofins TestAmerica, Buffalo

Narrative

Job Narrative

Comments
No additional comments.

Receipt
The samples were received on 11/26/2019 10:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.2º C.

GC/MS VOA
Method 8260C: The following volatiles samples were diluted due to foaming at the time of purging during the original sample analysis: 8ALC (480-163278-1), 8BLC (480-163278-2) and 8CLC (480-163278-3). Elevated reporting limits (RLs) are provided.

Method 8260C: The following samples were collected in a properly preserved vial; however, the pH was outside the required criteria when verified by the laboratory. The samples were analyzed within the 7-day holding time specified for unpreserved samples: 8ALC (480-163278-1), 8BLC (480-163278-2) and 8CLC (480-163278-3). Sample pH is 7.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals
Method 6010C: The method blank for preparation batch 480-506895 and analytical batch 480-507581 contained Total Sodium above the reporting limit (RL). Associated sample(s) 8ALC (480-163278-1), 8BLC (480-163278-2) and 8CLC (480-163278-3) were not re-extracted and/or re-analyzed because results were greater than 10X the value found in the method blank.

Method 6010C: The Calcium, Iron and Manganese results reported for the following sample do not concur with results previously reported for this site: 8CLC (480-163278-3). Reanalysis was performed, and the result(s) confirmed.

Methods 200.8, 6020A, 6020B: The interference check standard solution (ICSA) associated with batch 680-599333 had results for one or more elements at a level greater than 2 times the limit of detection (LOD). The vendor acknowledges that these elements are trace impurities in the ICSA standard. These results are not indicative of a matrix interference.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
Method 353.2: The Nitrate and Nitrite results reported for the following sample do not concur with results previously reported for this site: 8ALC (480-163278-1). Reanalysis was performed, and the result(s) confirmed.

Method Distill/Ammonia: Due to the matrix, the initial volume(s) used for the following samples deviated from the standard procedure: 8ALC (480-163278-1), 8BLC (480-163278-2) and 8CLC (480-163278-3). The reporting limits (RLs) have been adjusted proportionately.

Method SM 2540C: Due to the matrix, the initial volume(s) used for the following samples deviated from the standard procedure: 8ALC (480-163278-1), 8BLC (480-163278-2) and 8CLC (480-163278-3). The reporting limits (RLs) have been adjusted proportionately.

Methods 9038, D516-90, 02: The results reported for the following sample do not concur with results previously reported for this site: 8CLC (480-163278-3). Reanalysis was performed, and the result(s) confirmed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

This Detection Summary does not include radiochemical test results.

Detection Summary

Client: Waste Management
Project/Site: Crossroads ME-SA 8ALC, BLC, CLC

Job ID: 480-163278-1

Client Sample ID: TB

Lab Sample ID: 480-163278-4

No Detections.

This Detection Summary does not include radiochemical test results.

Client Sample ID: 8ALC

Date Collected: 11/25/19 13:00
Date Received: 11/26/19 10:00

Lab Sample ID: 480-163278-1

Matrix: Water

Method: 8260C - Volatile Organic Compounds by GC/MS

Accreditation/Certification Summary

Client: Waste Management
Job ID: 480-163278-1
Project/Site: Crossroads ME-SA 8ALC, BLC, CLC

Laboratory: Eurofins TestAmerica, Buffalo

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	NY00044	12-04-20

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
9038		Water	Sulfate
9251		Water	Chloride
Field Sampling		Water	Field EH/ORP
Field Sampling		Water	Field pH
Field Sampling		Water	Oxygen, Dissolved
Field Sampling		Water	Specific Conductance
Field Sampling		Water	Temperature
Field Sampling		Water	Turbidity
SM 1030E		Water	Anion/Cation Balance
SM 1030E		Water	Calculated TDS
SM 1030E		Water	TDS Ratio
SM 1030E		Water	TDS to Conductivity Ratio

Laboratory: Eurofins TestAmerica, Savannah

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	GA00006	09-25-20

Quantitation Limit Exceptions Summary

Client: Waste Management
Job ID: 480-163278-1
Project/Site: Crossroads ME-SA 8ALC, BLC, CLC

The requested project specific reporting limits listed below were less than laboratory standard quantitation limits (PQL) but greater than or equal to the laboratory method detection limits (MDL). It must be noted that results reported below lab standard quantitation limits may result in false positive/false negative values and less accurate quantitation. Routine laboratory procedures do not indicate corrective action for detections below the laboratory's PQL.

Method	Analyte	Matrix	Prep Type	Unit	Client RL	Lab PQL
6010C	Arsenic	Water	Total/NA	mg/L	0.0090	0.015
6010C	Calcium	Water	Total/NA	mg/L	0.15	0.50
6010C	Iron	Water	Total/NA	mg/L	0.030	0.05
6010C	Lead	Water	Total/NA	mg/L	0.0050	0.01
6010C	Sodium	Water	Total/NA	mg/L	0.40	1.0

Note: Since laboratory accreditations are subject to change, TestAmerica Laboratories, Inc. places the ownership of method, analyte & accreditation compliance upon out subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the TestAmerica laboratory or other instructions will be provided. Any changes to accreditation status should be brought to TestAmerica Laboratories, Inc. attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said complicance to TestAmerica Laboratories, Inc.

Possible Hazard Identification	*Sample Disposal (A fee may be assessed if samples are retained longer than 1 month)*

FIELD INFORMATION FORM

Site Name: Crossroads
Site Nbr:
Sample Point: BALC
Sample ID:

This Waste Management Field Information Form is Required. This form is to be completed in addition to any State Forms. This Field Form is submitted along with the Chain of Custody Form(s) that accompany the sample(s) contained (for with the cooler/box in relation to the laboratory).

Laboratory Use Only/Lab ID:

PURGE INFO

PURGE DATE (MM DD YY)	PURGE TIME (2400 Hr Clock)	PURGED TIME (hr:min)	CALCULATED VOL IN CASING (Gallons)	ACTUAL VOL PURGED (Gallons)	WELL VOLS PURGED

Note: For Low-Flow Sampling, Purge Vol in Casing and Well Vols "Spec" to Water Vol in Table. Use Calculated Time/Flow-Cell Vols Purged. Mark "--" & record field data, below.

PURGE/SAMPLE EQUIPMENT

Purging and Sampling Equipment: Dedicated: (Y) or N

Filter Device: Y or (N) (0.45 u) or _____ (circle or fill in)

Purging Device: —
A- Submersible Pump, D-Bailer
B-Peristaltic Pump, E-Piston Pump
C-QED Bladder Pump, F-Dipper/Bottle

Sampling Device: F

X-Other:

Filter Type: —
A-In-line Disposable, C-Vacuum
B-Pressure, X-Other:

Sample Tube Type: —
A-Teflon, C-PVC, X-Other:
B-Stainless Steel, D-Polypropylene

WELL DATA

Well Elevation (at TOC): (ft/msl)
Depth to Water (DTW) (from TOC): (ft)
Groundwater Elevation (w/r datum from TOC): (ft/msl)
Total Well Depth (from TOC): (ft)
Stick Up (from ground elevation): (ft)
Casing ID: (in)
Casing Material:

Note: Total Well Depth, Stick Up, Casing Id, etc. are optional and can be from historical data, unless required by Site/Permit. Well Elevation, DTW, and Groundwater Elevation must be current.

STABILIZATION DATA (Optional)

Sample Time (2400 Hr Clock)	Rate/Unit	pH (std)	Conductance (SC/EC) (µmhos/cm @ 25 °C)	Temp (°C)	Turbidity (ntu)	D.O. (mg/L - ppm)	eH/ORP (mV)	DTW (ft)
	1st							
	2nd							
	3rd							
	4th							
Suggested range for stabilized readings or more Permit/State requirements:		+/- 0.2	+/- 3%	--	--	+/- 10%	+/- 25 mV	Stabilize

Stabilization Data Fields are Optional (i.e. complete stabilization readings for parameters required by WM, Site, or State). These fields can be used where four (4) field measurements are required by State/Permit/Site. If a Data Logger or other Electronic format is used, fill-in final readings below and submit electronic data separately to Site. If more fields above are needed, use separate sheet or form.

FIELD DATA

SAMPLE DATE (MM DD YY)	pH (std)	CONDUCTANCE (umhos/cm @ 25°C)	TEMP. (°C)	TURBIDITY (ntu)	DO (mg/L-ppm)	eH/ORP (mV)	Other: Units
11/25/19	7.38	1805.2	17.1	13.4	3.6	-71.2	

Final Field Readings are required (i.e. record field measurements, final stabilized readings, passive sample readings before sampling for all field parameters required by State/Permit/Site.

FIELD COMMENTS

Sample Appearance: NORMAL Odor: STRONG Color: BROWN Other:

Weather Conditions (required daily, or as conditions change): Direction/Speed: W 5-10 Outlook: SUNNY Precipitation: Y or (N)

Specific Comments (including purge/well volume calculations if required):

I certify that sampling procedures were in accordance with applicable EPA, State, and WM protocols (if more than one sampler, all should sign):

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time (Excluding tests with immediate HTs)..	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	Katahdin
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	True	
Chlorine Residual checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Indicates an estimated value.
U	Not Detected above the associated Quantitaion Limit

GC Semi VOA

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

Metals

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

General Chemistry

Qualifier	Qualifier Description
U	Not Detected above the associated Quantitaion Limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 480-163981-1

Laboratory: Eurofins TestAmerica, Buffalo

Narrative

Job Narrative
480-163981-1

Comments
No additional comments.

Receipt
The samples were received on 12/11/2019 10:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.6º C.

GC/MS VOA
Method 8260C: The following volatiles samples were diluted due to foaming at the time of purging during the original sample analysis: TANK (480-163981-1), (480-163981-Q-1 MS) and (480-163981-Q-1 MSD). Elevated reporting limits (RLs) are provided.

Method 8260C: The following sample(s) was collected in a properly preserved vial; however, the pH was outside the required criteria when verified by the laboratory. The samples were analyzed within the 7-day holding time specified for unpreserved samples: TANK (480-163981-1), (480-163981-Q-1 MS) and (480-163981-Q-1 MSD). Sample pH is 7.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA
Method 8270D: The following sample was diluted due to the nature of the sample matrix: TANK (480-163981-1). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry
Method Distill/Ammonia: Due to the matrix, the initial volume(s) used for the following sample deviated from the standard procedure: TANK (480-163981-1). The reporting limits (RLs) have been adjusted proportionately.

Method SM 4500 Cl G: This analysis is normally performed in the field and has a method-defined holding time of 15 minutes. The following samples has been qualified with the "HF" flag to indicate analysis was performed in the laboratory outside the 15 minute timeframe: TANK (480-163981-1) and (480-163981-J-1 DU).

Method SM 2540C: Due to the matrix, the initial volume(s) used for the following sample deviated from the standard procedure: TANK (480-163981-1). The reporting limits (RLs) have been adjusted proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
Method 3510C: Due to the matrix, the initial volume(s) used for the following sample deviated from the standard procedure: TANK (480-163981-1). The reporting limits (RLs) have been adjusted proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: Waste Management
Job ID: 480-163981-1
Project/Site: Crossroads ME: S/A Leachate Tank

Laboratory: Eurofins TestAmerica, Buffalo

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Maine	State Program	NY00044	12-04-20

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
1010A		Leachate	Flashpoint
8270D	3510C	Leachate	Alpha-Terpineol
9040C		Leachate	pH
9040C		Leachate	Temperature
Field Sampling		Leachate	Field EH/ORP
Field Sampling		Leachate	Field pH
Field Sampling		Leachate	Oxygen, Dissolved
Field Sampling		Leachate	Specific Conductance
Field Sampling		Leachate	Temperature
Field Sampling		Leachate	Turbidity
SM 1030E		Leachate	Anion/Cation Balance
SM 1030E		Leachate	Calculated TDS
SM 1030E		Leachate	TDS Ratio
SM 1030E		Leachate	TDS to Conductivity Ratio
SM 4500 Cl G		Leachate	Chlorine, Total Residual

Laboratory: Eurofins TestAmerica, Canton

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Job ID: 480-163981-1

Lab Sample ID	Client Sample ID	Matrix	Collected	Received	Asset ID
480-163981-1	TANK	Leachate	12/10/19 15:00	12/11/19 10:00	
480-163981-2	TB	WQ	12/10/19 00:00	12/11/19 10:00	

Quantitation Limit Exceptions Summary

Client: Waste Management
Job ID: 480-163981-1
Project/Site: Crossroads ME: S/A Leachate Tank

The requested project specific reporting limits listed below were less than laboratory standard quantitation limits (PQL) but greater than or equal to the laboratory method detection limits (MDL). It must be noted that results reported below lab standard quantitation limits may result in false positive/false negative values and less accurate quantitation. Routine laboratory procedures do not indicate corrective action for detections below the laboratory's PQL.

Method	Analyte	Matrix	Prep Type	Unit	Client RL	Lab PQL
6010C	Arsenic	Leachate	Total/NA	mg/L	0.010	0.015
6010C	Lead	Leachate	Total/NA	mg/L	0.0050	0.01
6010C	Selenium	Leachate	Total/NA	mg/L	0.010	0.025
6020A	Aluminum	Leachate	Total/NA	mg/L	0.050	0.1

December 31, 2019

Ms. Lisa Shaffer
Test America

Amherst,NY 14228

RE: Katahdin Lab Number: TM2964
Project ID: Waste Management - Crossroads
Project Manager: Mr. Galen Nickerson
Sample Receipt Date(s): December 10, 2019

Dear Ms. Shaffer:

Please find enclosed the following information:

* Report of Analysis (Analytical and/or Field)
* Quality Control Data Summary
* Chain of Custody (COC)
* Login Report

A copy of the Chain of Custody is included in the paginated report. If requested, the original COC is attached as an addendum to this report.

Should you have any questions or comments concerning this Report of Analysis, please do not hesitate to contact the project manager listed above. The results contained in this report relate only to the submitted samples. This cover letter is an integral part of the ROA.

We certify that the test results provided in this report meet all the requirements of the NELAC standards unless otherwise noted in an attached technical narrative or in the Report of Analysis.

We appreciate your continued use of our laboratory and look forward to working with you in the future. The following signature indicates technical review and acceptance of the data.

Please go to http://www.katahdinlab.com/cert for copies of Katahdin Analytical Services Inc. current certificates and analyte lists.

Sincerely,
KATAHDIN ANALYTICAL SERVICES

Leslie Dimond

Leslie Dimond - Quality Assurance Officer

12/31/2019

Date

KATAHDIN ANALYTICAL SERVICES – INORGANIC DATA QUALIFIERS

The sampled date indicated on the attached Report(s) of Analysis (ROA) is the date for which a grab sample was collected or the date for which a composite sample was completed. Beginning and start times for composite samples can be found on the Chain-of-Custody.

U — Indicates the compound was analyzed for but not detected above the specified level. This level may be the Practical Quantitation Level (PQL) (also called Limit of Quantitation (LOQ)), the Limit of Detection (LOD) or Method Detection Limit (MDL) as required by the client.

Note: All results reported as "U" MDL have a 50% rate for false negatives compared to those results reported as "U" PQL "U" LOQ or "U" LOD, where the rate of false negatives is <1%.

E — Estimated value. This flag identifies compounds whose concentrations exceed the upper level of the calibration range of the instrument for that specific analysis.

J — Estimated value. The analyte was detected in the sample at a concentration less than the laboratory Practical Quantitation Level (PQL) (also called Limit of Quantitation (LOQ)), but above the Method Detection Limit (MDL).

I-7 — The laboratory's Practical Quantitation Level (PQL) or LOQ could not be achieved for this parameter due to sample composition, matrix effects, sample volume, or quantity used for analysis.

A-4 — Please refer to cover letter or narrative for further information.

H_ — Please note that the regulatory holding time for _____ is "analyze immediately". Ideally, this analysis must be performed in the field at the time of sample collection. _____ for this sample was not performed at the time of sample collection. The analysis was performed as soon as possible after receipt by the laboratory.

H1 - pH H2 - DO H3 - sulfite H4 - residual chlorine

T1 — The client did not provide the full volume of at least one liter for analysis of TSS. Therefore, the PQL of 2.5 mg/L could not be achieved.

T2 — The client provided the required volume of at least one liter for analysis of TSS, but the laboratory could not filter the full one liter volume due to the sample matrix. Therefore, the PQL of 2.5 mg/L could not be achieved.

M1 — The matrix spike and/or matrix spike duplicate recovery performed on this sample was outside of the laboratory acceptance criteria. Sample matrix is suspected. The laboratory criteria was met for the Laboratory Control Sample (LCS) analyzed concurrently with this sample.

M2 — The matrix spike and/or matrix spike duplicate recovery was outside of the laboratory acceptance criteria. The native sample concentration is greater than four times the spike added concentration so the spike added could not be distinguished from the native sample concentration.

R1 — The relative percent difference (RPD) between the duplicate analyses performed on this sample was outside of the laboratory acceptance criteria (when both values are greater than ten times the PQL).

MCL	Maximum Contaminant Level	NL	No limit
NFL	No Free Liquid Present	FLP	Free Liquid Present
NOD	No Odor Detected	TON	Threshold Odor Number

D-1 — As required by Method 5210B, APHA Standard Methods for the Examination of Water and Wastewater (21st edition), the BOD value reported for this sample is 'qualified' because the check standard run concurrently with the sample analysis did not meet the criteria specified in the method (198 +/- 30.5 mg/L). These results may not be reportable for compliance purposes.

D-2 — The measured final dissolved oxygen concentrations of all dilutions were less than the method-specified limit of 1 mg/L. The reported BOD result was calculated assuming a final oxygen concentration equal to 1 mg/L. The reported value should be considered a minimum value.

D-3 — The dilution water used to prepare this sample did not meet the method and/or regulatory criteria of less than 0.2 or 0.4 mg/L dissolved oxygen (DO) uptake over the five day period of incubation. These results may not be reportable for compliance purposes.

Note: Since laboratory accreditations are subject to change, TestAmerica Laboratories, Inc. places the ownership of method, analyte & accreditation compliance upon out subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the TestAmerica laboratory or other instructions will be provided. Any changes to accreditation status should be brought to TestAmerica Laboratories, Inc. attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said complicance to TestAmerica Laboratories, Inc.

Possible Hazard Identification	Sample Disposal (A fee may be assessed if samples are retained longer than 1 month)
Unconfirmed	☐ Return To Client ☐ Disposal By Lab ☐ Archive For _____ Months

FIELD INFORMATION FORM

WASTE MANAGEMENT

Site Name: Crossroads

Site No.:

Sample Point: TANK (Sample ID)

This Waste Management Field Information Form is Required
This form is to be completed, in addition to any State Forms. The Field Form is submitted along with the Chain of Custody Forms that accompany the sample containers (i.e. with the cooler that is returned to the laboratory).

Laboratory Use Only/Lab ID:

PURGE INFO

PURGE DATE (MM DD YY)	PURGE TIME (2400 Hr Clock)	ELAPSED HRS (hr:min)	WATER VOL IN CASING (Gallons)	ACTUAL VOL PURGED (Gallons)	WELL VOLs PURGED
12/10/19					

Note: For Passive Sampling, replace "Water Vol in Casing" and "Well Vols Purged" w/ Water Vol in Tubing/Flow Cell and Tubing/Flow Cell Vols Purged. Mark changes, record field data, below.

PURGE/SAMPLE EQUIPMENT

Purging and Sampling Equipment ... Dedicated: (Y) or N

Purging Device: ✓

Sampling Device: F

A- Submersible Pump, B-Peristaltic Pump, C-QED Bladder Pump, D-Bailer, E-Piston Pump, F-Dipper/Bottle

X-Other:

Filter Device: Y or (N) — 0.45 µ or _____ µ (circle or fill in)

Filter Type: ✓ — A-In-line Disposable, B-Pressure, C-Vacuum, X-Other

Sample Tube Type: ✓ — A-Teflon, B-Stainless Steel, C-PVC, D-Polypropylene, X-Other:

WELL DATA

Well Elevation (at TOC): (ft/msl)

Depth to Water (DTW) (from TOC): (ft)

Groundwater Elevation (site datum, from TOC): (ft/msl)

Total Well Depth (from TOC): (ft)

Stick Up (from ground elevation): (ft)

Casing ID: (in)

Casing Material:

Note: Total Well Depth, Stick Up, Casing Id, etc. are optional and can be from historical data, unless required by Site/Permit. Well Elevation, DTW, and Groundwater Elevation must be current.

STABILIZATION DATA (Optional)

Sample Time (2400 Hr Clock)	Rate/Unit	pH (std)	Conductance (SC/EC) (µmhos/cm @ 25 °C)	Temp. (°C)	Turbidity (ntu)	D.O. (mg/L - ppm)	eH/ORP (mV)	DTW (ft)
	1st	1st	1st					
	2nd	2nd	2nd					
	3rd	3rd	3rd					
	4th	4th	4th					
Suggested range for 3 consec. readings or note Permit/Site requirements:		+/- 0.2	+/- 3%			+/- 10%	+/- 25 mV	Stabilize

Stabilization Data Fields are Optional *(i.e. complete stabilization readings for parameters required by WM, Site, or State). These fields can be used where four (4) field measurements are required by State/Permit/Site. If a Data Logger or other Electronic format is used, fill in final readings below and submit electronic data separately to Site. If more fields above are needed, use separate sheet or form.*

FIELD DATA

SAMPLE DATE (MM DD YY)	pH (std)	CONDUCTANCE (umhos/cm @ 25°C)	TEMP. (°C)	TURBIDITY (ntu)	DO (mg/L-ppm)	eH/ORP (mV)	Other: Units
12/10/19	7.71	17496	13.1	654	4.2	-332	

Final Field Readings are required *(i.e. record field measurements, final stabilized readings, passive sample readings before sampling for all field parameters required by State/Permit/Site.*

Sample Appearance: Dark Odor: Strong Color: Brown Other:

Weather Conditions (required daily, or as conditions change): Direction/Speed: 10 SW Outlook: cloudy Precipitation: (Y) or N

Specific Comments (including purge/well volume calculations if required):

FIELD COMMENTS

I certify that sampling procedures were in accordance with applicable EPA, State, and WM procedures (if more than one sampler, all should sign):

Date	Name	Signature	Company

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time (Excluding tests with immediate HTs)..	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Sampling Company provided.	True	KAS
Samples received within 48 hours of sampling.	True	
Samples requiring field filtration have been filtered in the field.	True	
Chlorine Residual checked.	N/A

02-Mar-19	1060	173.77	0	0.00		Increased secondary flow directly related to snow melt and/or rain. A specific conductance sample collected on 3/15/2004 supports this conclusion. Increased flow reported to MDEP on 3/16/2004. WMDSM to evaluate in the Spring.

MONITORING WELL INTEGRITY FIELD SURVEY

WMNA Well I.D. TOTMAN
Permit Well I.D.

Facility Name: **Crossroads Landfill Norridgewock, ME**
Evaluator: **Nick Adams**
Evaluation Date: 6/13/2019

	Y	N	NA	CARS
LOCATION				
1. Is the well location appropriately shown on a facility permit and/or design drawing?	X			
2. Are the wells in hard to find areas adequately flagged?	X			
3. Is the well elevation information correct?			X	
WELL CHARACTERISTICS & INTEGRITY				
4. Is the well [X] Aboveground? [ ] Flush with the surface?				
5. No physical damage to wells?	X			
6. Is the well labeled on the outside?	X			
7. Is the well labeled on the inside?	X			
8. Does the well have protective posts?		X		
a. How many? _____				
b. Are the posts painted or flagged?			X	
9. Are the wells in or near a low point?		X		
a. No evidence of ponded water around the well?	X			
10. Do aboveground wells have weep holes at the base of the protective casing?	X			
11. Does the area around the well appear clean (i.e., no mounds of waste; no dead animals)?	X			
12. Is the casing secure (attempt to move along two perpendicular axes)?	X			
13. Is the surface seal void of differential erosion around and under the base?	X			
14. Is the surface seal free of cracks?	X			
15. Is the surface seal sloped to prevent ponding in the immediate vicinity of the surface seal?		X		
16. Is the monitoring well locked to prevent unauthorized access?	X			
17. Is the cap void of large gaps which breach security?	X			
18. Is the locking cap free of rust?		X		

Comments:

NOTE:

Comments: The steel well casing is very rusty. Standing water was observed inside the metal well casing. The cap is not covering the PVC, and is located a few inches above well. Wiring to the pump is located outside the PVC. *Slash/hole near bottom (2016).

2. Are the wells in hard to find areas adequately flagged?			X	
3. Is the well elevation information correct?			X	
WELL CHARACTERISTICS & INTEGRITY				
4. Is the well [X] Aboveground? [ ] Flush with the surface?				
5. No physical damage to wells?	X			
6. Is the well labeled on the outside?	X			
7. Is the well labeled on the inside?		X		
8. Does the well have protective posts?		X		
a. How many?				
b. Are the posts painted or flagged?			X	
9. Are the wells in or near a low point?		X		
a. No evidence of ponded water around the well?	X			
10. Do aboveground wells have weep holes at the base of the protective casing?	X			
11. Does the area around the well appear clean (i.e., no mounds of waste; no dead animals)?	X			
12. Is the casing secure (attempt to move along two perpendicular axes)?	X			
13. Is the surface seal void of differential erosion around and under the base?	X			
14. Is the surface seal free of cracks?	X			
15. Is the surface seal sloped to prevent ponding in the immediate vicinity of the surface seal?	X			
16. Is the monitoring well locked to prevent unauthorized access?	X			
17. Is the cap void of large gaps which breach security?	X			
18. Is the locking cap free of rust?	X

a. No evidence of ponded water around the well?	X			
10. Do aboveground wells have weep holes at the base of the protective casing?	X			
11. Does the area around the well appear clean (i.e., no mounds of waste; no dead animals)?	X			
12. Is the casing secure (attempt to move along two perpendicular axes)?	X			
13. Is the surface seal void of differential erosion around and under the base?	X			
14. Is the surface seal free of cracks?	X			
15. Is the surface seal sloped to prevent ponding in the immediate vicinity of the surface seal?	X			
16. Is the monitoring well locked to prevent unauthorized access?	X			
17. Is the cap void of large gaps which breach security?	X			
18. Is the locking cap free of rust?	X

APPENDIX E

Surface Water Sampling Location Inspection Forms

Location **SW-101** Date 5/15/2019 Sampler Nick Adams
Temp. 80 Weather Sunny

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location **SW-102** Date 5/15/2019 Sampler Nick Adams
Temp. 80 Weather Sunny

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	Sticks/damming	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location **SW-201** Date 5/15/2019 Sampler Nick Adams
Temp. 80 Weather Sunny

		Comments
1. Is location easy to access?	Yes	Stake under water
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location **SW-203** Date 5/15/2019 Sampler Nick Adams
Temp. 80 Weather Sunny

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location	**SW-204**	Date	5/15/2019	Sampler	Nick Adams
Temp.	80	Weather	Sunny		

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location	**SW-801**	Date	5/15/2019	Sampler	Nick Adams
Temp.	80	Weather	Sunny		

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location	**SW-9**	Date	5/15/2019	Sampler	Nick Adams
Temp.	80	Weather	Sunny		

		Comments
1. Is location easy to access?	Yes	Stake out of water
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location	**SW-A**	Date	5/15/2019	Sampler	Nick Adams
Temp.	80	Weather	Sunny		

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	No	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	Yes	No real channel at low water levels
5. Note changes in water color or sediment load?	No	

Location	**SW-B**	Date	5/15/2019	Sampler	Nick Adams
Temp.	80	Weather	Sunny		

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	No	
3. Is flow obstructed?	Sticks/damming	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No	

Location	**SW-C**	Date	5/15/2019	Sampler	Nick Adams
Temp.	80	Weather	Sunny		

		Comments
1. Is location easy to access?	Yes	
2. Is location labeled sufficiently?	Yes	
3. Is flow obstructed?	No	See flow measurements
4. Is there evidence of significant erosion or changes in the stream channel?	No	
5. Note changes in water color or sediment load?	No

Turbidity		NTU	0.1	0.1	NC	NC
Temperature		Degrees C	9	9	NC	NC
Field pH		SU	7.21	7.21	NC	NC
Specific Conductance		umhos/cm	153	153	NC	NC
Field ORP		millivolts	-195.0	-195.0	NC	NC
Oxygen, Dissolved		mg/L	1.3	1.3	NC	NC

Notes:
(1) The calculated RPD for this analyte is above 10%; however, the concentrations detected for both the primary and the duplicate samples are not greater than five times their respective reporting limits; therefore, are not required to be reported
RPD = relative percent difference
NC = not calculated
ND = not detected above laboratory reporting limits
NTU = nephelometric turbidity units
SU = standard units
umhos/cm = micromhos per centimeter
mg/L = milligrams per liter
Eh/ORP= reduction potential/oxidation reduction potential

STATISTICAL ANALYSIS OF
2019 GROUNDWATER QUALITY RESULTS
CROSSROADS LANDFILL

INTRODUCTION

Statistical analyses have been performed for the Crossroads Landfill following the statistical program submitted to the Maine Department of Environmental Protection (MEDEP) in June 2017 (*Statistical Analysis Program for Groundwater Quality Monitoring, June 2017)*. The June 2017 revisions to the program were prepared in order to address MEDEP comments dated May 19, 2017. This statistical program has been designed using both interwell and intrawell statistical methods that will provide for the identification of statistically significant trends and statistically significant water-quality results above background to meet the requirements of Chapter 405(3)B. The most recent groundwater monitoring event was performed in November and December 2019 and data from this event are statistically analyzed herein. Figure 1 displays the locations of the monitoring wells at the Crossroads Landfill and Table 1 lists the wells in the monitoring program. Upgradient phreatic zone well W11-1E was abandoned in October 2018 and the replacement well was sampled for the first time during the November 2018 event. The water-quality data from the replacement well were reviewed and found to be consistent with the water-quality data from W11-1E. Therefore, the groundwater quality data for the two wells have been combined and analyzed herein as well W11-1E/ER.

STATISTICAL PROGRAM

General Conditions

Statistical analyses have been performed using the DUMPStat statistical analysis software for all of the wells listed on Table 1 and for the parameters listed on Table 2. All analyses have been performed consistent with the USEPA Unified Guidance document (*Statistical Analysis of Groundwater Monitoring Data at RCRA Facilities, Unified Guidance, USEPA 2009*) and ASTM statistical guidance (*Developing Appropriate Statistical Approaches for Ground-Water Detection Monitoring Programs, ASTM Standard D6312-98, 1998*). The

following statistical methodology has been used to statistically analyze the 2019 water-quality results: Intrawell Mann-Kendall trend analysis, interwell parametric and nonparametric prediction limits, and linear regression with 99% confidence bands (ORP only).

STATISTICAL ANALYSIS RESULTS

Intrawell Mann-Kendall Trend Analysis

Attachment A contains the results of the intrawell Mann-Kendal trend analyses and is organized by monitored unit. Only wells/parameters having statistically significant upward or downward trends are displayed in Attachment A. At the top of each graph it is noted whether the statistically significant trend is upward or downward. The Mann-Kendall analyses have been performed for all wells included on Table 1 and the parameters listed on Table 2, with the exception of ORP and VOCs.

The test has been performed at the 95% confidence level with alpha = 0.05 being split between each tail resulting in an actual 97.5% overall confidence level. As required by MEDEP, the time-series graphs for datasets having fewer than 10 detected results have been redacted from the trend testing output included in Attachment A, as indicated by a red line through the graphs. Starting in 2018, the parameters that are required to be collected annually have been added to the tri-annual event parameter list. For those parameters, it is still necessary to use a 10-year moving window to perform the Mann-Kendall analyses in order to maximize the amount of detected results included in the window. It is possible that some wells/parameters have less than 10 detected results within this 10-year window; therefore, these results have been redacted as described above. For the tri-annual parameters, a 5-year moving window has been used to perform the Mann-Kendall analyses. Any well/parameter having less than 10 detected results within the 5-year window has been redacted. Table 3 is a summary of wells/parameters having statistically significant trends. Identified trends are discussed in the 2019 groundwater report.

Interwell Prediction Limits

Interwell prediction limits have been used to compare up- and downgradient water quality for Phases 11 and 12. Due to the spatial and hydrogeologic variability in the vicinity of Phases 1-10, interwell statistical analysis will not be performed on groundwater quality from these areas consistent with the statistical program for the site (*Statistical Analysis Program for Groundwater Quality Monitoring, June 2017*). A minimum of 8 background results are necessary to compute the normal, lognormal, and nonparametric prediction limits. No prediction limit analyses have been performed for parameters having less than 8 background results. Water-quality data from the upgradient wells in Phases 11 and 12 have been pooled to calculate the interwell prediction limits for the Phreatic and Till monitoring units for the parameters shown on Table 2. Normality testing has been performed using the multiple group version of the Shapiro-Wilks normality test. Outlier testing was performed using Dixon's outlier test and identified outliers have been evaluated on an individual basis to determine if the results are appropriate for inclusion in the statistical background period. Outlier analyses have been performed for the results contained in the interwell background periods which is comprised of data from the last 5 years as described in the statistical program.

Any identified outliers are listed on the tables included in Attachment B and any outliers that have been excluded are illustrated on the trend plots in Attachment D. The following outlier has been excluded from the upgradient background pool: 5/2015 chloride result of 4.2 mg/l for well W11-2E (Phase 11, upgradient phreatic well, low outlier). This result has been excluded as an extreme low value that could bias the background mean and standard deviation used in the determination of the prediction limits.

A 5-year moving window approach has been utilized so that the interwell prediction limits are representative of current upgradient groundwater quality conditions. The highest nondetect result (reporting limit) has been used to substitute for nondetect results in background for all statistical analyses.

The following rules apply to the calculation of the interwell prediction limits:

1. If the detection frequency for the pooled upgradient data set is greater than 50%:
   a. If the data are normally distributed, normal prediction limits have been computed.
   b. If the data are lognormally distributed, lognormal prediction limits have been computed.
   c. If neither normally nor lognormally distributed, a nonparametric prediction limit has been computed.

2. If the background detection frequency is less than 50%, a nonparametric prediction limit has been computed.

The most recent result for each well/parameter has been compared to the prediction limits. Table 4 displays the wells and parameters that exceed the prediction limits. Attachment B includes the results of the interwell prediction limit analyses for the till and phreatic zone wells in Phases 11 and 12. These results are further discussed in the 2019 groundwater report.

Volatile Organic Compound Results

A monitoring measurement at or above the laboratory specific practical quantification limit (PQL) for a volatile organic compound (VOC) is considered a statistically significant increase. Confirmatory resampling may be conducted in the event that a result exceeds the PQL for a VOC. If the resample or reanalysis does not confirm a statistically significant increase, the well will continue in detection monitoring. There were no VOC results detected at or above the PQL for the 2019 tri-annual events.

LINEAR REGRESSION AND TIME-SERIES ANALYSIS

For the field parameter ORP, linear regression analyses have been performed whereby 99% confidence bands have been applied to each set of data. A 5-year moving window approach

has been used for analysis of the ORP data. Attachment C contains the graphs for the ORP analyses organized by zone and gradient. The following wells display results from the most recent tri-annual event that fall outside of the 99% confidence bands: 310AW and 617A (upgradient phreatic wells); 629E, 630E, W9-1E, W11-3E, W11-6E, and W12-4E (downgradient phreatic wells); W12-1B (upgradient till well); 626B, 629B, and 1041B (downgradient till wells); and 628A (downgradient bedrock well). Time-series graphs with applicable protection standards are presented for each well/parameter in Attachment D.

SUMMARY

The intrawell Mann-Kendall trend test has been performed for all monitoring wells in the detection monitoring system. Interwell prediction limit analyses have been performed for the downgradient wells in Phases 11 and 12 in the Phreatic and Till monitoring units. A minimum of 8 background results were used to perform the interwell prediction limit analyses. Outlier testing was performed prior to calculation of the interwell prediction limits and extreme results have been excluded. Groundwater quality data from the upgradient wells in Phases 11 and 12 have been pooled to calculate the prediction limits. Linear regression with 99% confidence bands has been used to statistically analyze the data for ORP.

The results of the statistical analyses contained in this report are discussed in detail within the 2019 groundwater report for the site.

N = Total number of independent measurements in background at each well.
Date Range = Dates of the first and last measurements included in background at each well.
Critical Value depends on the significance level and on N-1 when the two most extreme values are tested or N for the most extreme value.

Table 2

Shapiro-Wilk Multiple Group Test of Normality

Constituent	Detect	N	Detect Freq	G raw	G log	G cbrt	G sqrt	G sqr	G cub	Crit Value	Dist Form	Model Type

* - Distribution override for that constituent.
Fit to distribution is confirmed if G <= critical value.
Model type may not match distributional form when detection frequency < 50%.

Table 3

Detection Frequencies in Upgradient and Downgradient Wells

Constituent	Upgradient Detect	Upgradient N	Upgradient Proportion	Downgradient Detect	Downgradient N	Downgradient Proportion
Alkalinity, total (as caco3)	29	44	0.659	404	404	1.000

Total organic carbon (toc)	mg/L	7	44					3.1000	nonpar		0.99

Conf = confidence level for passing initial test or one verification resample at all downgradient wells for a single constituent (nonparametric test only).
* - Insufficient Data.
** - Calculated limit raised to Manual Reporting Limit.
*** - Nonparametric limit based on ND value.
For transformed data, mean and SD in transformed units and prediction limit in original units.
All sample sizes and statistics are based on outlier free data.
For nonparametric limits, median reporting limits are substituted for extreme reporting limit values.

Table 5

Results of Interwell Analyses

N = Total number of independent measurements in background at each well.
Date Range = Dates of the first and last measurements included in background at each well.
Critical Value depends on the significance level and on N-1 when the two most extreme values are tested or N for the most extreme value.

* - Distribution override for that constituent.
Fit to distribution is confirmed if G <= critical value.
Model type may not match distributional form when detection frequency < 50%.

Table 3

Detection Frequencies in Upgradient and Downgradient Wells

Constituent	Upgradient Detect	Upgradient N	Upgradient Proportion	Downgradient Detect	Downgradient N	Downgradient Proportion

Conf = confidence level for passing initial test or one of two verification resamples at all downgradient wells for a single constituent (nonparametric test only).
* - Insufficient Data.
** - Calculated limit raised to Manual Reporting Limit.
*** - Nonparametric limit based on ND value.
For transformed data, mean and SD in transformed units and prediction limit in original units.
All sample sizes and statistics are based on outlier free data.
For nonparametric limits, median reporting limits are substituted for extreme reporting limit values.

Table 5

APPENDIX N

Response to MEDEP August 6, 2019 Comments

April 9, 2020 Project No. 20137272

Ms. Linda J. Butler, Licensing & Compliance Specialist
Maine Department of Environmental Protection
17 State House Station
Augusta, Maine 04333-0017

RE: RESPONSE TO MEDEP AUGUST 6, 2019 REVIEW COMMENTS
2018 ANNUAL REPORT-SUMMARY OF 2018 ENVIRONMENTAL MONITORING INFORMATION
WASTE MANAGEMENT DISPOSAL SERVICES OF MAINE, INC. – CROSSROADS LANDFILL
NORRIDGEWOCK MAINE

Dear Ms. Butler:

On behalf of Waste Management Disposal Services of Maine, Inc. (WMDSM), Golder Associates Inc. (Golder) is providing this memorandum in response to the Maine Department of Environmental Protection's (MEDEP's) August 6, 2019 review comments on the 2018 Annual Report, Appendix F, Summary of 2018 Environmental Monitoring Information. The following section summarizes MEDEP's comments and Golder's responses.

Comment 1: Preservation and Technical Holding Times – 4.2.2. We appreciate for checking hold times. In the future, if analytical results were compromised by inadequate QC and the results were not detection, please use a "UJ" flag. This will indicate that although the parameter was not detected, it could be because it was out of the hold time.

Golder's response: For all future sampling events, Golder will use a "UJ" qualifier to indicate a non-detect result analyzed outside of holding time.

Comment 2: Statistical Analysis – 5.9. The statistical analysis and evaluation of the results is very thorough and well-presented. In general, MEDEP concurs with the conclusions which are consistent with our assessment. We would like some clarification, however, of the explanation for the increasing concentrations at W12-5E and W11-4E. Our understanding of the explanation is that connate water is being squeezed out of the clay into the groundwater by the overlying weight of the landfill. It's an interesting suggestion, but we wonder why the chloride concentrations wouldn't be high in the groundwater if there is connate water in the clay, which would essentially be seawater. The chloride concentrations at both these wells are quite low (<6 mg/L).

Golder's response: The trend in chloride concentrations at W11-4E follow the same trend as the other parameters, although the magnitude of change is low. Chloride levels increased from approximately 1.5 mg/L in 1999 to approximately 6 mg/L in 2018 (see below). Chloride trends at W12-5E are less distinct. It's possible there was a peak concentration in 2004 (see below).

As observed elsewhere at the Crossroads facility, changes in groundwater chloride concentrations occur quickly relative to the concentrations of other anions and cations, thus making chloride useful for identifying the on-set of

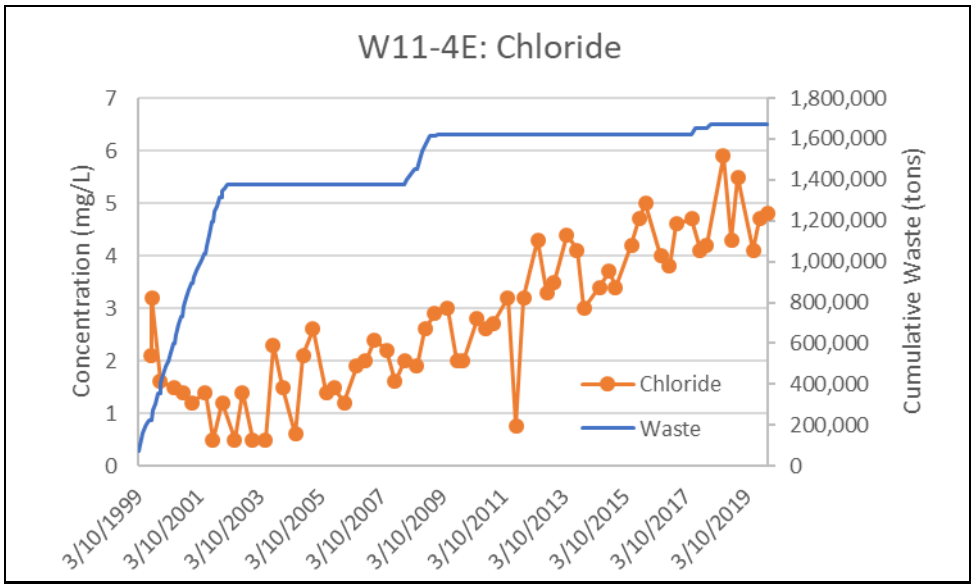
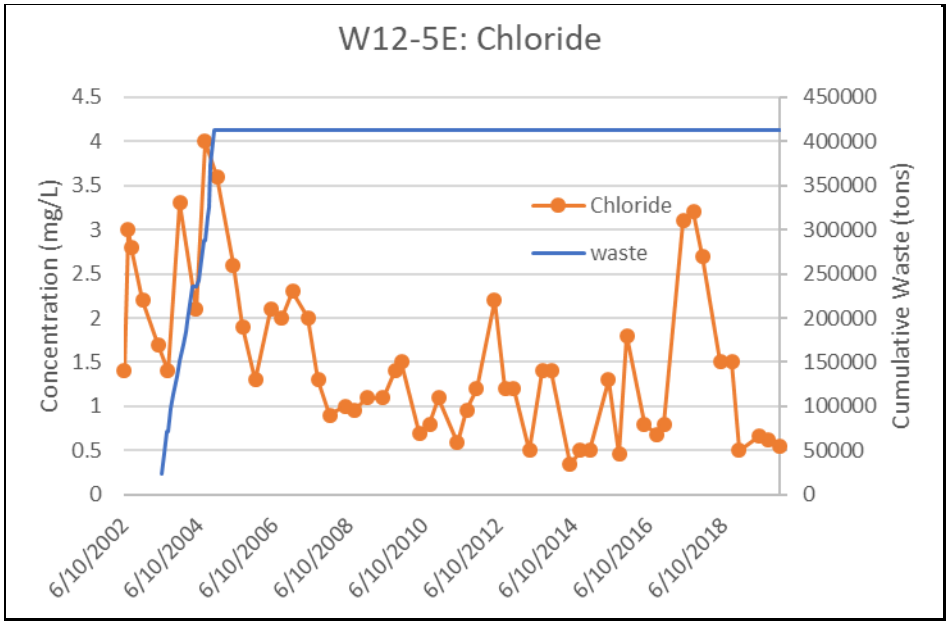
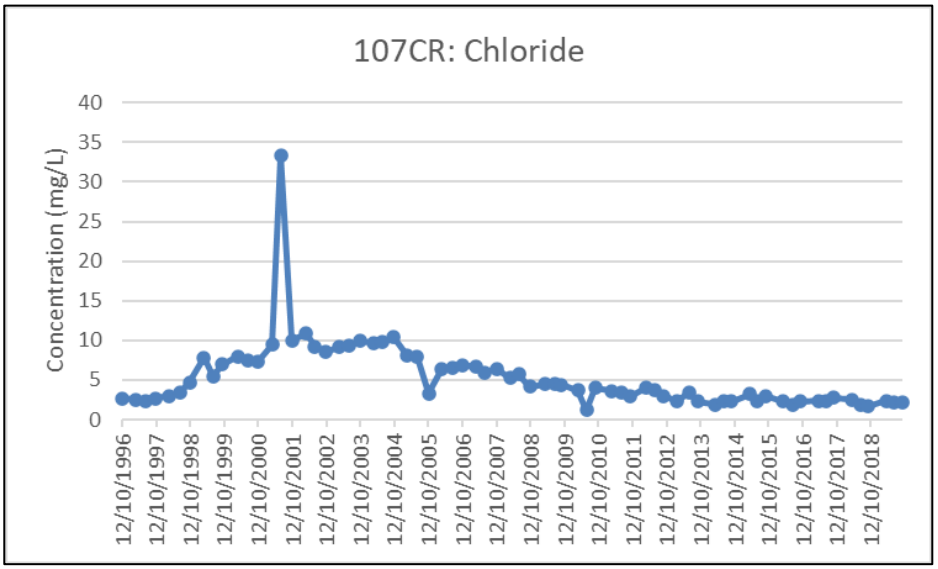
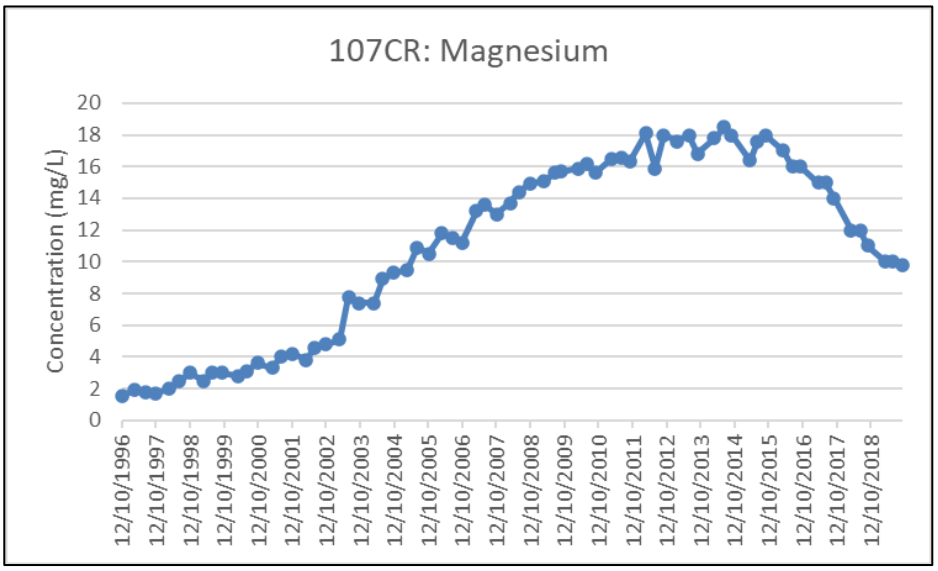
chemistry changes in groundwater because chloride is highly soluble and is rapidly transported in groundwater systems (i.e., chloride has a low retardation factor). However, while chloride is a good indicator for initial changes in water quality, it has been observed to “recover” (i.e., return to initial concentrations) quickly and distinctly. Golder’s suspects that chloride is so rapidly transported as pore water from the gray clay and mixes with phreatic groundwater, that the potential increase in chloride concentrations was not detected in the samples collected. As observed elsewhere at the Crossroads facility, changes in other parameter concentrations take longer to initially observe and the higher concentrations persist much longer. See the example below from monitoring well 107CR.









Should you have any questions about these responses, please feel free to contact Danielle Sylvia Cofelice at 603-668-0880.

Sincerely,
